**After the Software Wars Dec 22 2022** Computers are an advancement whose importance is comparable to the invention of the wheel or movable type. While computers and the Internet have already changed many aspects of our lives, we still live in the dark ages of computing because proprietary software is still the dominant model. One might say that the richest alchemist who ever lived is my former boss, Bill Gates. (Oracle founder Larry Ellison, and Google co-founders Sergey Brin and Larry Page are close behind.) Human knowledge increasingly exists in digital form, so building new and better models requires the software to be improved. People can only share ideas when they also share the software to display and modify them. It is the expanded use of free software that will allow a greater ability for people to work together and increase the pace of progress. This book will demonstrate that a system where

anyone can edit, share, and review the body of work will lead not just to something that works, but eventually to the best that the world can achieve! With better cooperation among our scientists, robot-driven cars is just one of the many inventions that will arrive -- pervasive robotics, artificial intelligence, and much faster progress in biology, all of which rely heavily on software. - Publisher.

*The Shunt Book* Jan 11 2022 Shunt: a mechanism which bypasses/diverts accumulations of fluid to an

absorbing or excreting system. Though the shunt operation is the most common neurosurgical procedure performed, it has a high failure rate (one year averaged a 30% failure rate). A problem is the lack of understanding and lack of knowledge, by neurosurgeons, of basic fluid dynamics and internal workings of the shunts themselves. They simply use "what they were trained on" without the benefit of an objective guide to the best shunts and why they are superior to others. As the author states, their only other source of information comes from biased manufacturer's representatives. The Shunt Book fills a void in the literature by presenting basic information on types of shunts and their functions, thus allowing neurosurgeons to rationally select shunt equipment and understand their mechanical effects. This inexpensive and easily accessible handbook offers chapters on fluid dynamics, internal mechanisms of shunts, types of shunts available, alternative devices and how to measure shunt effectiveness. This volume discusses How shunts work, How shunts fail, Alternatives to shunts, and Measuring implanted shunt performance.

*Retail Sales and Use Tax Report* Jul 17 2022  
Statistics on sales taxes collected, and three use taxes: motor vehicle use, retailers use, and consumers use.

**An Introduction to the DLNA Architecture** Sep 26 2020 This book describes the architecture and protocols for interconnecting media devices in home networks. The architecture and protocols described in this book have been developed during the last 10 years by R&D teams from several companies working jointly in two industry organizations known as UPnP and DLNA. This book mainly deals with the DLNA (Digital Living Network Alliance) protocol. This text is especially relevant for the design and development of smart homes, where media devices, communication devices, appliances, and sensors are all integrated in an intelligent network.

Major Companies of The Far East and Australasia  
1991/92 Aug 26 2020 This book represents the  
eighth edition of what has become an established  
reference work, MAJOR COMPANIES OF THE  
Guide to the FAR EAST & AUSTRALASIA. This  
volume has been carefully researched and updated  
since publication of the previous arrangement of  
the book edition, and provides more company data  
on the most important companies in the region. The  
Information in the This book has been arranged in  
order to allow the reader to book was submitted  
mostly by the companies themselves, find any entry  
rapidly and accurately completely free of charge.  
For the second time, a third volume has been added  
to the series, covering major companies In  
Company entries are listed alphabetically within  
each section; Australia and New Zealand. In  
addition three indexes are provided on coloured  
paper at the back of the book. The companies listed

have been selected on the grounds of the size of their sales volume or balance sheet or their The alphabetical index to companies throughout South East importance to the business environment of the country In Asia lists all companies having entries in the book irrespective which they are based. of their main country of operation. The book is updated and published every year Any company The alphabetical index to companies within each country of that considers it is eligible for InClUSion in the next edition of South East ASia lists companies by their country of operation.
