Wine drinking culture in France has traditionally been a source of pride for the French and in an age of concerns about the dangers of 'binge-drinking', a major cause of jealousy for the British. Wine drinking and the culture associated with it are, for many, an essential part of what it means to be French, but they are also part of a national construction. Described by some as a national product, or as a 'totem drink', wine and its attendant cultures supposedly characterise Frenchness in much the same way as being born in France, fighting for liberty or speaking French. Yet this traditional picture is now being challenged by economic, social and political forces that have transformed consumption patterns and led to the fragmentation of wine drinking culture. From

Blenheim and Waterloo to 'Up Yours, Delors' and 'Hop Off You Frogs', the cross-Channel relationship has been one of rivalry, misapprehension and suspicion. But it has also been a relationship of envy, admiration and affection. In the nearly two centuries since the final defeat of Napoleon, France and Britain have spent much of that time as allies - an alliance that has been almost as uneasy, as competitive and as ambivalent as the generations of warfare. Their rivalry both on peace and war, for good and ill, has shaped the modern world, from North America to India in the eighteenth century, in Africa, the Middle East and South East Asia during the nineteenth and twentieth centuries, and it is still shaping Europe today. This magisterial book, by turns provocative and delightful, always fascinating, tells the rich and complex story of the relationship over three centuries, from the beginning of the great struggle for mastery during the reign of Louis XIV to the second Iraq War and the latest enlargement of the EU. It tells of wars and battles, ententes and alliances, but also of food, fashion, sport, literature, sex and music. Its cast ranges from William and Mary to Tony Blair, from Voltaire to Eric Cantona; its sources from ambassadorial dispatches to police reports, from works of philosophy to tabloid newspapers, from guidebooks to cartoons and films. It's a book which brings both British humour and Gallic panache to the story of these two countries, in sickness and in health, for richer for poorer, in victory and in defeat, in dominance and in decline. Dr Cave studies the relationship between the traditions of personal devotion in sixteenth-century France and the poetry which flourished at the end of the century and the beginning of the seventeenth. It was a poetry of intense personal commitment, preoccupied with penitence and confession, the vanity of life, the imminence of death, the meaning of the Incarnation and the Passion; often verging on mysticism and mingling of the sensual, the intellectual and the spiritual in a manner often thought typical of the baroque. It was part of a European movement, and there is much here to interest the student of the early seventeenth-century sensibility. A comparable book on English literature is Louis Martz's *The Poetry of Meditation*, but the lines of Dr Cave's enquiry are new. The book has a fourfold interest: to readers concerned with French literature; to those with particular interest in the traditions of devotion; to those concerned with comparative studies in the baroque period, and to students of rhetorical analysis. The 18th century was a wealth of knowledge, exploration and rapidly growing technology and expanding record-keeping made possible by advances in the printing press. In its determination to preserve the century of revolution, Gale initiated a revolution of its own: digitization of epic proportions to preserve these invaluable works in the largest archive of its kind. Now for the first time these high-quality digital copies of original 18th century manuscripts are available in print, making them highly accessible to libraries, undergraduate students, and independent scholars. Delve into what it was like to live during the eighteenth century by reading the first-hand accounts of everyday people, including city dwellers and farmers, businessmen and bankers, artisans and merchants, artists and their patrons, politicians and their constituents. Original texts make the American, French, and Industrial revolutions vividly contemporary. ++++ The below data was compiled from various identification fields in the bibliographic record of this title. Pierre Etienne Dumont and translated into English by Samuel Romilly and James Scarlett. This translation includes some original letters of Romilly's. With a final errata leaf. London: printed for J. Johnson, 1792. xvi,371, [3]p.; 8° Description: Soldiers decorating a street display. Scholars across disciplines on both sides of the Atlantic have recently begun to open up, as never before, the scholarly study of race and racism in France. These original essays bring together in one volume new work in history, sociology, anthropology, political science, and legal studies. Each of the eleven articles presents fresh research on the tension between a republican tradition in France that has long denied the legitimacy of acknowledging racial difference and a lived reality in which racial prejudice shaped popular views about foreigners, Jews, immigrants, and colonial people. Several authors also examine efforts to combat racism since the 1970s. Kathleen A. Turitto is in her late sixties when she tries something new: taking French classes at Palomar College in San Marcos, California. Under the guidance of Professor Ray Adams, she learns to read and even understand conversational French. She is feeling confident when she sees a notice on a classroom bulletin board that reads: Enroll at the Sorbonne. One month\$999 including meals, lodgings, excursions, and air fare from Los Angeles. As someone who is always looking for a bargain, she jumps at the chance naively thinking that if she can read and understand French, she can easily learn to speak it. In this memoir, she looks back at her journey to France, and how once there, she navigated taking exams, finding her way through Paris, networking with students, and conquering her fears. Along the way, she meets people she'll never forget, including an Australian named Paula Burk, who she runs into by happenstance at a cafeteria. Soon, the two women are enjoying each others company over coffee, meals, and warm conversation. If you've ever felt too timid to try something new or embark on an adventure by yourself, then you'll be emboldened by these recollections. French scientists, engineers, and public officials were responsible for the most important and distinctive innovations in cartography in eighteenth-century Europe. By expanding the analytical uses of maps, by establishing unprecedented standards of accuracy, and by nurturing institutional frameworks to sustain mapping projects over many years, the French contributed to one of the central concepts of modern times: that man, through direct observation and accumulated information can better understand and manage his affairs. Concentrating on how and why new concepts and techniques of making and using maps were introduced, Josef Konvitz skillfully traces the modernization of cartography during the French Enlightenment. The story he unfolds is not merely a narrative of who did what, but an analysis of how the map itself influenced attitudes toward the land and the consequent effects on planning and the development of resources. Throughout, Konvitz demonstrates the significant relationship between cartography and political, economic, and military life. He emphasizes efforts to enlarge the practical applications of maps in government and the impact of government policy on the evolution of cartography. In the archives of the Special Operations Executive lay a report compiled by a staff officer and former member of SOE's French Section, Major Robert Bourne-Patterson, that until recently could not be published. Because of the highly sensitive nature of the work undertaken by the SOE, the paper was treated as confidential and its circulation was strictly limited to selected personnel. Now, at last, it can be made available to the general public.Limited,

also, was the time available to Bourne-Patterson in compiling his report in 1946 as the SOE was being wound up and many documents were being weeded from the files. Nevertheless, the paper he wrote gives a good picture of the work of the SOE in France, the country where its operations were most extensive. It contains an overview of operations in France by the Special Operations Executive during the Second World War with detailed records of individual circuits from their inception onwards, containing much information concerning individual agents and their contacts, calendars of subversive activity against the Germans and the names and addresses of personnel connected with the circuits who had survived the war. In writing his account, Bourne-Patterson drew heavily on personal interviews and wartime debriefings by agents.

Women's Writing in Twenty-First Century France is a collection of critical essays on recent women-authored literature in France. It takes stock of the themes, issues and trends in women's writing of the first decade of the twenty-first century, and it engages critically with the work of individual authors through close textual readings. Authors covered include major prizewinners, best-selling authors, established and new writers whose work attracts scholarly attention, including those whose texts have been translated into English such as Christine Angot, Nina Bouraoui, Marie Darrieussecq as Chloé Delaume, Claudie Gally and Anna Gavaldà. Themes include translation, popular fiction, society, history, war, family relations, violence, trauma, the body, racial identity, sexual identity, feminism, life-writing and textual/aesthetic experiments. Since the 1980s, France has experienced a vigorous revival of interest in its past and cultural heritage. This has been expressed as part of a movement of remembering through museums and festivals as well as via elaborate commemorations, most notably those held to celebrate the bi-centenary of the Revolution in 1989 and can be interpreted as part of a re-examination of what it means to be French in the context of ongoing Europeanization. This study brings together scholars from multidisciplinary backgrounds and engages them in debate with professionals from France, who are working in the fields of museology, heritage and cultural production. Addressing subjects such as war and memory, gastronomy and regional identity, maritime culture and urban societies, they throw fresh light on the process by which France has been conceptualized and packaged as a cultural object. The crises and conflicts of mid-century Europe highlight the fragility of individual life and commitment. Yet this was a time at which individuals engaged in politics on an unprecedented scale, whether in movements, parties and street politics, through culture, or by the choices confronted in war and occupation. Focusing on France, and bringing together historians of politics, literature, philosophy, art, and film, this volume sheds new light on the imagination and experience of the political individual in the age of the masses. From a controversial art exhibition on Algeria to the private diary of a Jewish lawyer in Occupied Paris, these case studies illuminate the specificities of French ideas and experiences in mid-century Europe. They also contribute to a deeper understanding of memory, agency, and responsibility in times of crisis.

Book jacket. An extensive and authoritative study that examines the economic, social and political crises of France during the revolution of 1848. Using analysis of original sources and recent research, Fortescue here offers new interpretations of events leading up to and after the second republic was declared. Looking at Louis Philippe's overthrow, the proclamation of manhood suffrage and the

unexpected success of the right-wing in the subsequent elections, this book evaluates the political history of France in 1848 and the French political culture of the time. This should be read by all students of nineteenth century history, political scientists and all those with an interest in the historical development of French political culture.

"The Cult of the Modern focuses on nineteenth-century France and Algeria and examines the role that ideas of modernity and modernization played in both national and colonial programs during the years of the Second Empire and the early Third Republic. Gavin Murray-Miller rethinks the subject by examining the idiomatic use of modernity in French cultural and political discourse. The Cult of the Modern argues that the modern French republic is a product of nineteenth-century colonialism rather than a creation of the Enlightenment or the French Revolution. This analysis contests the predominant Parisian and metropolitan contexts that have traditionally framed French modernity studies, noting the important role that colonial Algeria and the administration of Muslim subjects played in shaping understandings of modern identity and governance among nineteenth-century politicians and intellectuals. In synthesizing the narratives of continental France and colonial North Africa, Murray-Miller proposes a new framework for nineteenth-century French political and cultural history, bringing into sharp relief the diverse ways in which the French nation was imagined and represented throughout the country's turbulent postrevolutionary history, as well as the implications for prevailing understandings of France today"-- This is a practical, serious and enjoyable guide which aims to present the French way of life to help the reader adapt to living in France. All aspects of everyday life are covered, and comments from foreigners in France add further insights. This comprehensive history shows how France coupled the pursuit of power and the furtherance of European integration over a 60 year period, from the close of the Second World War to the hesitation caused by the French electorate's referendum rejection of the European Union's constitutional treaty in 2005. The Fall of France in 1940 has been well chronicled but numerous misconceptions remain. This fascinating and thought-provoking collection of essays on wide-ranging issues covering the politics and fighting on land, sea and in the air will be greatly welcomed by academics and military history enthusiasts. Topics covered include the preparations of the BEF, the failure of allied counter attacks, the air war, the Royal Navys's role in the campaign, the influence of the Battle on British military doctrine and the repercussions from the British, French and German angles. While the Revolution gave urgency and tangible reality to millenarian convictions, Labrousse, Théot, and others were convinced, well before the Revolution, that they were the bearers of divine revelations and thus welcomed the Revolution as confirmation of their own missions. Excerpt from *The Paternal State in France and Germany* IT is almost an impertinence nowadays to remind a reader of past events; we travel so fast through life that Old scenes, if remembered at all, are remembered only as it were by their picturesque

features, by their peculiarly Odd or extraordinary forms. Our allotted time is brief, and the past, with its cumbersome civilization, is ever receding from our View. Nevertheless, we all know that nothing happens by accident in human evolution; that there is a cause behind every phenomenon, be it a physical, a political, or a social one and we know that there is a law connecting the cause with the effect recorded in past annals. It has always struck me that the relations existing between some of the most important phenomena of French and German history, and their real, permanent causes, have never been sufficiently examined. If we all know, for instance, why the French nation overthrew its old absolute monarchy in 1793, we seldom ask ourselves why a still more absolute and despotic republic, and, later on, an absolute and despotic empire, were substituted for it. Again, we all know that the modern French and German people, borrowing parliamentary forms from England. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Painters have found in food a persuasive metaphor for the divinity of nature; authors wrote in Paris's cafes, and wrote of the pleasures and importance of food in French culture. Inspired by art, French chefs created dishes as much for the way they looked as for their taste. Part history, part guidebook, Baxter's book offers a seductive menu of those places in the French capital where art and food have intersected, and brings to life the culinary experiences of Paris. -- adapted from back cover. This provocative and non-polemic study explores the value system of the National Front movement in France, and explains the way in which the movement's ideology has been formulated and articulated in the 1980s and 1990s. Also discussing the crucial role of Le Pen, this book provides a fascinating enquiry into the most controversial political party in contemporary France. Derived from the renowned multi-volume International Encyclopaedia of Laws, this very useful analysis of constitutional law in France provides essential information on the country's sources of constitutional law, its form of government, and its administrative structure. Lawyers who handle transnational matters will appreciate the clarifications of particular terminology and its application. Throughout the book, the treatment emphasizes the specific points at which constitutional law affects the interpretation of legal rules and procedure. Thorough coverage by a local expert fully describes the political system, the historical background,

the role of treaties, legislation, jurisprudence, and administrative regulations. The discussion of the form and structure of government outlines its legal status, the jurisdiction and workings of the central state organs, the subdivisions of the state, its decentralized authorities, and concepts of citizenship. Special issues include the legal position of aliens, foreign relations, taxing and spending powers, emergency laws, the power of the military, and the constitutional relationship between church and state. Details are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for both practising and academic jurists. Lawyers representing parties with interests in France will welcome this guide, and academics and researchers will appreciate its value in the study of comparative constitutional law. French Books III & IV complete a comprehensive bibliographical survey of all books published in France in the first age of print. It draws on the analysis of over 3,000 collections situated in libraries throughout the world. French Books will be an invaluable research tool for all students and scholars interested in the history, culture and literature of France, as well as historians of the early modern book world.--Publisher's website. This book is a volume in the Penn Press Anniversary Collection. To mark its 125th anniversary in 2015, the University of Pennsylvania Press rereleased more than 1,100 titles from Penn Press's distinguished backlist from 1899-1999 that had fallen out of print. Spanning an entire century, the Anniversary Collection offers peer-reviewed scholarship in a wide range of subject areas. This book represents the third in the series on the Precambrian and Palaeozoic geology of Circum-Atlantic regions developed under the IGCP (International Geological Correlation Programme) Project # 233 on Terranes in the Circum-Atlantic Palaeozoic Orogens. The book is an up-to-date and comprehensive account of the Pre Mesozoic Geology of France (Armorican and Central Massifs) and related areas (Aquitaine Basin, Vosges, Crystalline Provence, Pyrenees, western Alps, Corsica and Sardinia) that systematically reviews the geophysics, stratigraphy, palaeontology, structure, metamorphism, igneous activity and metallogeny. The need for such a book became apparent at the international conference held in Montpellier, France, in August, 1988, where a vast amount of new information was presented. The collection of papers presented at the conference and published in *Tectonophysics*, however, does not give the comprehensive treatment of the geology required for terrane analysis that is provided by this book. We sincerely appreciate the work of the reviewers whose comments have helped to ensure that this book has an international appeal. We also thank the authors whose diligent efforts have provided an excellent synthesis. Halifax, Nova Scotia, Canada 1993 J. been shaped by admiration of or hostility toward the other. Harold Mah explores the interweaving paths of German and French cultural identity that emerged in the Enlightenment and continued through the nineteenth century and into the twentieth. Mah argues that the efforts of German and French intellectuals and artists to formulate stable cultural identities constantly collapsed in the face of other powerful images and the rush of history. In Mah's view, these shifting conceptions of cultural identity are problematic phantasies, internally unstable and prone to falling apart under the pressure of events, only to be replaced by new, equally problematic constructions. Mah offers fresh analyses of a wide range of iconic texts and artworks, including those of Jacques-Louis David, de Staël, Diderot, and Rousseau in France and Goethe, Hegel, Herder, Mann, Marx, and Nietzsche in Germany. Mah's book examines how attempts to define cultural identities were caught up in issues of language, gender, classical revival, politics, and modernity. Enlightenment Phantasies presents the shaping of cultural identity in narratives accessible not only to specialists but also to students and all readers concerned with the history of Western culture. The story of Julia Child's years in France, where she fell in love with French food and found "her true calling." From the moment she and her husband Paul, who worked for the USIS, arrived in the fall of 1948, Julia had an awakening that changed her life. Soon this tall, outspoken gal from Pasadena, California, who didn't speak a word of French and knew nothing about the country, was steeped in the language, chatting with purveyors in the local markets, and enrolled in the Cordon Bleu. She teamed up with two fellow gourmettes, Simone Beck and Louisette Bertholle, to help them with a book on French cooking for Americans--From publisher description. This is the only comparative study of its kind, investigating how women construct their roles within the public sphere and highlighting the ways in which traditional versus modern values impact on female identity in France and Spain. Which female figures are proposed for our admiration? Who proposes them and what values do they represent? This study embarks on an analysis of such cultural icons, going on to address contemporary roles and issues concerning women in the two countries. Finally, Twomey shows how these two strands of discussion inform and interact with each other. The 20th Century – the Century of Women – is celebrated for advancing the cause of women's rights and the contributing authors look to the future and to opportunities presented by the new century. By the end of the eighteenth century, the French dominated the world of science. And although science and politics had little to do with each other directly, there were increasingly frequent intersections. This is a study of those transactions between science and state, knowledge and power--on the eve of the French Revolution. Charles Gillispie explores how the links between science and polity in France were related to governmental reform, modernization of the economy, and professionalization of science and engineering.
