Are free market economies really based on fleecing the consumer? Is the U.S. economy truly just a giant free-for-all that encourages duplicity in our everyday transactions? Is everyone from corporate CEOs to your local car salesman really looking to make a buck at your expense? In *Freedomnomics: Why the Free Market Works and Other Half-Baked Theories Don't*, economist and bestselling author John R. Lott, Jr., answers these and other common economic questions, bravely confronting the profound distrust of the

market that the bestselling book *Freakonomics* has helped to popularize. Using clear and hard-hitting examples, Lott shows how free markets liberate the best, most creative, and most generous aspects of our society - while efforts to constrain economic liberty, no matter how well-intentioned, invariably lead to increased poverty and injustice. Like it or not, the automobile industry is now and will remain an overwhelming factor in the lives of most people - if not an owner and driver, then as a pedestrian or a breather of air, which is being polluted by the gas-guzzling and vile-air belching monsters created for our individual hedonistic pleasure. Is your company a storyteller—or a storydoer? The

old way to market a business was storytelling. But in today's world, simply communicating your brand's story in the hope that customers will listen is no longer enough. Instead, your authentic brand must be evident in every action the organization undertakes. Today's most successful businesses are storydoers. These companies create products and services that, from the very beginning, are manifestations of an authentic and meaningful story—one told primarily through action, not advertising. In True Story, creative executive Ty Montague argues that any business, regardless of size or industry, can embrace the principles of storydoing. Indeed, our best-run companies—from small start-ups to global conglomerates—organize around a coherent narrative that is then broadcast through every action they take (from product design to customer service to marketing). Montague shows why storydoing firms are nimble, more adaptive to change, and more efficiently run

businesses. Montague is a founder of the growth consultancy co:collective and the former president and CCO of J. Walter Thompson, the largest advertising agency in North America. He brings his depth of creative business experience to the book and provides a clear framework and proven process for bringing you and your customers together in the creation of your brand story. Montague introduces five critical elements—what he calls the “the four truths and the action map”—that are the foundation of storydoing: • the participants (your customers, partners, and employees) • the protagonist (your company today) • the stage (the world around your business) • the quest (your driving ambition and contribution to the world) • your action map (the actions that will make your story real for participants) The book is filled with examples of how forward-thinking organizations—including Red Bull, Shaklee, Grind, TOMS Shoes, and News Corporation—are effectively using storydoing to transform their organizations and

drive extraordinary results. Described in this guide are 30 trails for hikers of all ages and skill levels. Trails range from short, easy hikes to more difficult challenges. Camping information, estimated hiking time, trail narratives, directions to trailheads, maps, trail length, elevation gains, difficulty, and much more are included.
