The Comedy Central Roast of Trump was the first major live broadcast to place a hashtag in the corner of the screen to encourage real-time reactions on Twitter, generating more than 25,000 tweets and making the broadcast the most-watched Roast in Comedy Central history. The #trumproast initiative personified the media and tech industries' utopian vision for a multi-screen and communal live TV experience. In Social TV: Multi-Screen Content and Ephemeral Culture, author Cory Barker reveals how the US television industry promised—but failed to deliver—a social media revolution in the 2010s to combat the imminent threat of on-demand streaming video. Barker examines the rise and fall of Social TV across press coverage, corporate documents, and an array of digital ephemera. He demonstrates that, despite the talk of disruption, the movement merely aimed to exploit social media to reinforce the value of live TV in the modern attention economy. Case studies from broadcast networks to tech start-ups uncover a persistent focus on community that aimed to monetize consumer behavior in a transitional industry period. To trace these unfulfilled promises and flopped ideas, Barker draws upon a unique mix of personal Social TV experiences and curated archives of material that were intentionally marginalized amid pivots to the next big thing. Yet in placing this now-forgotten material in recent historical context, Social TV shows how the era altered how the industry pursues audiences. Multi-screen campaigns have shifted away from a focus on live TV and toward all-day "content" streams. The legacy of Social TV, then, is the further embedding of media and promotional material onto every screen and into every moment of life. 4LTR Press solutions give students the option to choose the format that best suits their learning preferences. In the late 2000s, television no longer referred to an object to be watched; it had transformed into content to be streamed, downloaded, and shared. Tens of millions of viewers have "cut the cord," abandoned cable television, tuned into online services like Netflix, Hulu, and YouTube, and also watch pirated movies and programmes at an unprecedented rate. The idea that the Internet will devastate the television and film industry in the same way that it gutted the music industry no longer seems farfetched. The television industry, however, remains driven by outmoded market-based business models that ignore audience behaviour and preferences. In Post-TV, Michael Strangelove explores the viewing habits and values of the post-television generation, one that finds new ways to exploit technology to find its entertainment for free, rather than for a fee. Challenging the notion that the audience is constrained by regulatory and industrial regimes, Strangelove argues that cord-cutting, digital piracy, increased competition, and new modes of production and distribution are making audiences and content more difficult to control, opening up the possibility of a freer, more democratic, media environment. A follow-up to the award-winning Watching YouTube, Post-TV is a lively examination of the social and economic implications of a world where people can watch what they want, when they want, wherever they want. In its 114th year, Billboard remains the world's premier weekly music publication and a diverse digital, events, brand, content and data licensing platform.
