*The perfect resource for budding bird-watchers. Because birds can be found in every neighborhood, and in all seasons, they're an excellent choice for piquing children's interest in wildlife. Here's a comprehensive guide to birds that makes the perfect starting point. Beautiful pages explore many different bird species and their fascinating and unique characteristics, from feathers to eggs and nests. A year in the life of birds explains what to look for, season by season. And the beginning bird-watcher section helps kids get started in the field. Birds of a feather? More like, birds of every feather here! Kids will be grabbing their binoculars to spot them all around! "An engaging and inspiring comprehensive guide." —Booklist "A great benefit of creating a bird-friendly landscape is enjoying your garden while watching a bluebird dropping in for a worm in a freshly dug patch, a phoebe snapping at insects, or a hummingbird probing nectar-rich flowers while robins sing in the trees." With the right native plants, arranged to mimic natural ecosystems, you will provide birds with food, water, shelter, and nesting places. Instead of just visiting your garden to snack, birds will call it home! George Adams offers close-up profiles of birds from across all regions of North America to teach you their nesting, breeding, and feeding habits along with guidance for regional plant selection and garden design. Presents engaging vignettes about the private lives of birds, from family life to coping with today's environments, all explained in an evolutionary context. New edition of this pocket-sized guide to birds from the experts at the RSPB – Europe's largest conservation organisation From the Sandwich Tern to the Short-toed Eagle discover over 320 species of bird found in the UK and Europe. Close-up photographs and notes on distinguishing features will help you identify different species of bird in the field. Learn all about them from their calls and feeding behaviour to nesting habits and habitats. Maps showing regions where each species can be found at what time of year will help you find the birds you are most interested in. Fits easily into a pocket – take it out in the field when you're spotting. Every fact and image is fully authenticated by the RSPB making this a must have for enthusiasts of all levels. Many species of birds travel thousands of miles from their breeding grounds to their winter quarters, to return again the following spring. How do they find their way? How is it that young and inexperienced birds are able to travel independently of their parents and still reach their destination? The first edition of Dr Matthews' monograph, published in 1955, summarised the experimental work which had been done up until that time and this second edition has built upon that important contribution, with extensive changes. Several developments are described, namely, the discovery that birds can orientate with reference to star patterns, the use of radar to follow migration by night as well as by day, and the attachment of miniature radio-transmitters to birds so that their individual flights can be followed. A new class of unexplained 'nonsense' orientation is also brought to light. Including the multicolored lovebird and the brightly hued canary, this book features fun and easy-to-follow instructions on how to draw birds. Along with brilliant photographs, readers will enjoy watching a finished picture emerge as they work from a pencil sketch to coloring their picture. Cool facts about each kind will make any reader a bird lover. The bird book for birders and nonbirders alike that will excite and inspire by providing a new and deeper understanding of what common, mostly backyard, birds are doing—and why: "Can birds smell?"; "Is this the same cardinal that was at my feeder last year?"; "Do robins 'hear' worms?" "The book's beauty mirrors the beauty of birds it describes so marvelously." —NPR In *What It's Like to Be a Bird*, David Sibley answers the most frequently asked questions about the birds we see most often. This special, large-format volume is geared as much to nonbirders as it is to the out-and-out obsessed, covering more than two hundred species and including more than 330 new illustrations by the author. While its focus is on familiar backyard birds—blue jays, nuthatches, chickadees—it also examines certain species that can be fairly easily observed, such as the seashore-dwelling Atlantic puffin. David Sibley's exacting artwork and wide-ranging expertise bring observed behaviors vividly to life. (For most species, the primary illustration is reproduced life-sized.) And while the text is aimed at adults—including fascinating new scientific research on the myriad ways birds have adapted to environmental changes—it is*

nontechnical, making it the perfect occasion for parents and grandparents to share their love of birds with young children, who will delight in the big, full-color illustrations of birds in action. Unlike any other book he has written, *What It's Like to Be a Bird* is poised to bring a whole new audience to David Sibley's world of birds. Straight from the internationally renowned bird-watching team of Kit and George Harrison comes the shocking, eye-opening truth: raw facts of love and sex among the feathered species. In *Birds Do It, Too*-the Harrisons introduce the reader to multiple variations of love among birds, ranging from the friendly wren in your backyard to the over-endowed alpine accentor, from the cuckolded chickadee to the lesbian gulls of Santa Barbara Island. The details are fascinating, amusing and frank. With a light, wry touch, the Harrisons chronicle scientifically accurate tidbits, as illustrator Michael James Riddet wields a delicate pencil capturing each moments in striking black-and-white detail. From 4 years old Discover all the vocabulary related to the birds and memorise it thanks to thorough descriptions and detailed pictures! The "Let's play with words" collection gathers illustrated ebooks for children, which aim to make them learn essential words on varied topics. **EXTRACT** Birds are covered with feathers called plumage. This protects them from the cold and allows to fly. The plumage of some birds can be very colourful. They fly with wings which are equipped with flight feathers. Birds do not give birth to living offspring but lay eggs instead, which then hatch in the nest. They use the beak to feed themselves, arrange their plumage and gather material to build their nest. **ABOUT THE COLLECTION** "Let's play with words" is a fun collection of e-books that promotes literacy and vocabulary acquisition on popular subjects taken from the world around us. Each book includes several short chapters on the subject at hand aimed at learning specific words through pictures, and includes the fully written texts as a guide at the back. For more advanced practice, young readers can also make up their own stories by following the pictures only, in such a way consolidating their vocabulary using their own words. The books are a useful source of learning specific vocabulary for native English speakers as well as learners of English – of all ages ! In the "Let's play with words" series : • In the garden • The Bees • On the farm • On the road • In the forest **ABOUT THE AUTHORS** Ivan Esenko presents the world of nature and invites the reader to learn more about the world that we are part of. His camera is his most faithful companion and its lens particularly likes to 'capture' those animals that live in close quarters to man. We take them so much for granted that we no longer seem to care for them. Ivan is their voice, he has become their 'personal' photographer. Alenka Vuk Trotovšek is an illustrator who knows how to give her imagination wings. She is inspired by fairy tales, children and nature. She likes to

create dynamic illustrations with a touch of humour and mischief. She makes her characters come alive by breathing special life into them. ABOUT THE PUBLISHER Okaši is a Slovenian publisher with a vibrant programme. At every turn, nature reveals its new face and discloses a myriad of secrets. This is why we have devoted a special place to it in our publishing house. We are the creators of books that delight curious children and their parents in their discoveries of nature : in the home garden and the nearby park, but also further afield, in the fields and forests. At Okaši we keep pace with the times which is why we have embarked upon several electronic editions of our books. We have added sound to these publications and hence a new dimension to the contents already there. Presents the songs and calls of fifty North American birds that are common to residential settings, city parks, and urban areas. At twelve years old, Lev Parikian was an avid birdwatcher. He was also a fraud, a liar and a cheat. Those lists of birds seen and ticked off? Lies. One hundred and thirty species? More like sixty. Then, when he turned fifty, he decided to right his childhood wrongs. He would go birdwatching again. He would not lie. He would aim to see two hundred species of British bird in a year. Why Do Birds Suddenly Disappear? is the story of that year, a story about birds, family, music, nostalgia, the nature of obsession and obsession with nature. It's about finding adventure in life when you twig it's shorter than you thought, and about losing and regaining contact with the sights, sounds and smells of the natural world. It's a book for anyone who has ever seen a small brown bird and wondered what it was, or tried to make sense of a world in which we can ask, 'What's that bird?' and 'What's for lunch?' and get the same answer. Excerpt from *The Travels of Birds: Our Birds and Their Journeys to Strange Lands* It is true that man makes longer journeys than birds do. But it is also true that he could not make them without help from other men. He might walk where there was land, but he would need days to go as far as a bird could go in an hour. And when he comes to the sea he requires a sailing vessel or steamer with charts and maps and compass to aid him in finding the way; while in the hold there must be food for the use of the crew and passengers during the voyage. But the bird traveler asks help from no one. He has no use for locomotives, automobiles or steamships. He carries no chart and no compass, and he can go with ease to parts of the world which it took man many years to reach, and to some parts of the world which still are unknown to man. There are many bird books written nowadays which will tell you about birds as folk of the twentieth century see them. They describe carefully the singer's house, his habits, the number of his little wife's eggs, and the color of every tiny feather on her pretty wings. But these books tell you nothing at all about bird-history;

about what birds have meant to all the generations of men, women, and children since the world began. You would think, to read the words of the bird-book men, that they were the very first folk to see any bird, and that what they think they have seen is the only matter worth the knowing. Now the interesting facts about birds we have always with us. We can find them out for ourselves, which is a very pleasant thing to do, or we can take the word of others, of which there is no lack. But it is the quaint fancies about birds which are in danger of being lost. The long-time fancies which the world's children in all lands have been taught are quite as important as the every-day facts. They show what the little feathered brothers have been to the children of men; how we have come to like some and to dislike others as we do; why the poets have called them by certain nicknames which we ought to know; and why a great many strange things are so, in the minds of childlike people. Sharon Stiteler, widely known as The Bird Chick, shares practical and versatile tips that everyone can use, whether you live in an urban apartment or home, small-town condo or sprawling rural farm. IT has become a universal custom to obtain and preserve the likenesses of one's friends. Photographs are the most popular form of these likenesses, as they give the true exterior outlines and appearance, (except coloring) of the subjects. But how much more popular and useful does photography become, when it can be used as a means of securing plates from which to print photographs in a regular printing press, and, what is more

astonishing and delightful, to produce the real colors of nature as shown in the subject, no matter how brilliant or varied. We quote from the December number of the Ladies' Home Journal: "An excellent suggestion was recently made by the Department of Agriculture at Washington that the public schools of the country shall have a new holiday, to be known as Bird Day. Three cities have already adopted the suggestion, and it is likely that others will quickly follow. Of course, Bird Day will differ from its successful predecessor, Arbor Day. We can plant trees but not birds. It is suggested that Bird Day take the form of bird exhibitions, of bird exercises, of bird studies—any form of entertainment, in fact, which will bring children closer to their little brethren of the air, and in more intelligent sympathy with their life and ways. There is a wonderful story in bird life, and but few of our children know it. Few of our elders do, for that matter. A whole day of a year can well and profitably be given over to the birds. Than such study, nothing can be more interesting. The cultivation of an intimate acquaintanceship with our feathered friends is a source of genuine pleasure. We are under greater obligations to the birds than we dream of. Without them the world would be more barren than we imagine. Consequently, we have some duties which we owe them. What these duties are only a few of us know or have ever taken the trouble to find out. Our children should not be allowed to grow to maturity without this knowledge. The more they know of the birds the better men and women they will be. We can hardly encourage such studies too much." Of all animated nature, birds are the most beautiful in coloring, most graceful in form and action, swiftest in motion and most perfect emblems of freedom. They are withal, very intelligent and have many remarkable traits, so that their habits and characteristics make a delightful study for all lovers of nature. In view of the facts, we feel that we are doing a useful work for the young, and one that will be appreciated by progressive parents, in placing within the easy possession of children in the homes these beautiful photographs of birds. The text is prepared with the view of giving the children as clear an idea as possible, of haunts, habits, characteristics and such other information as will lead them to love the birds and delight in their study and acquaintance. *The Birds that do not Sing: A world on fire, a community in turmoil, a family torn by its principles Beautifully observed and thought provoking, this unforgettable story of growing up in wartime Britain will appeal to fans of Crooked Heart and Angela's Ashes, with its captivating window into the mind of a young boy searching for meaning and purpose as the bombs are falling. November 1940 - The Coventry Blitz That day changes everything for ten-year-old Jim. Coventry smoulders on the horizon, neighbours are missing, and faces are grim all around. It is the day when family and neighbourhood collides, a time of confusion and recrimination, of choices that will echo for a lifetime. Jimmy Brown plays in the park on Sundays whatever anyone says. His family has a reputation, his father a militant socialist who makes surgical boots in his shed, his sister struggling with polio as she distributes pacifist leaflets, and his brother refusing to fight for his country. When the Luftwaffe comes and public opinion shifts behind the war effort, social expectation and conflicting loyalties send Jimmy down a fateful path. Present day. 'The past is never still, never silent.' 'Little birds that do not sing... must be made to sing.' That is what old Jim's teacher would say in a classroom where beatings were a daily occurrence, and as threatening than the Luftwaffe passing overhead. Seventy-five years later the words still have their hold on him, and the events of that November day haunt his dreams and waking hours despite the passing of decades. When he hears about a concrete elephant in a nearby garden he wonders if it is the one his father made before the war, the elephant who listened to his troubles when he was young, who heard him when nothing made sense. Will it help him to face what happened that day in 1940 at last, or open up new and more painful wounds? Get In Touch With Nature! The Amelia Bedelia books are great for growing the vocabularies of newly independent readers. Amelia Bedelia Is for the Birds is a funny story about nature, friendship, and family, and it stars Amelia Bedelia as a young girl. More than 35 million Amelia Bedelia books sold since 1963. When a pair of robins begins building a nest in Amelia Bedelia's swing set, she is torn between wanting to clear it off so that she can continue to slide down her slide, and giving up that fun so she can watch the birds raising their babies. She sides with the birds, and observing them informs her about her own family. This is a Level One I Can Read book, which means it's perfect for children learning to sound out words and sentences, and features the childhood of America's favorite housekeeper, Amelia Bedelia! Describes twenty-two birds with unusual habits or characteristics, including the ostrich, kiwi, honey guide, and hornbill. Many birds can learn tricks and games, play, and even speak, making for a fascinating pet. A bird may seem like the perfect pet for a child, but what really goes into owning a bird? This book introduces readers to the responsibilities, costs, and challenges of taking care of a pet bird, from picking the perfect cage to engaging in enrichment activities. With full-color photographs, accessible text, and fun fact boxes, readers will dive into the fact-filled details of bird ownership.*
