International Handbook of Media Literacy Education Jul 03 2021 At the forefront in its field, this Handbook examines the theoretical, conceptual, pedagogical and methodological development of media literacy education and research around the world. Building on traditional media literacy frameworks in critical analysis, evaluation, and assessment, it incorporates new literacies emerging around connective technologies, mobile platforms, and social networks. A global perspective rather than a Western-centric point of view is explicitly highlighted, with contributors from all continents, to show the empirical research being done at the intersection of media, education, and engagement in daily life. Structured around five themes—Educational Interventions; Safeguarding/Data and Online Privacy; Engagement in Civic Life; Media, Creativity and Production; Digital Media Literacy—the volume as a whole emphasizes the competencies needed to engage in meaningful participation in digital culture.

Campaigning for Children Aug 24 2020 Advocates within the growing field of children's rights have designed dynamic campaigns to protect and promote children's rights. This expanding body of international law and jurisprudence, however, lacks a core text that provides an up-to-date look at current children's rights issues, the evolution of children's rights law, and the efficacy of efforts to protect children. Campaigning for Children focuses on contemporary children's rights, identifying the range of abuses that affect children today, including early marriage, female genital mutilation, child labor, child sex tourism, corporal punishment, the impact of armed conflict, and access to education. Jo Becker traces the last 25 years of the children's rights movement, including the evolution of international laws and standards to protect children from abuse and exploitation. From a practitioner's perspective, Becker provides readers with careful case studies of the organizations and campaigns that are making a difference in the lives of children, and the relevant strategies that have been successful—or not. By presenting a variety of approaches to deal with each issue, this book carefully teases out broader lessons for effective social change in the field of children's rights.

Financial Education in Europe Trends and Recent Developments Aug 04 2021 This publication provides an overview of the recent trends and developments in financial education in Europe and offers policy and practical suggestions for European policy makers and other stakeholders.

Multilingual Hong Kong: Languages, Literacies and Identities Oct 18 2022 This volume gives an up-to-date account of the language situation and social context in multilingual Hong Kong. After an in-depth, interpretive analysis of various language contact phenomena, it shows why it is such a tall order for Hongkongers to live up to the Special Administrative Region government's language policy goalpost, 'biliteracy and trilingualism'. A detailed contrastive analysis between Cantonese and (a) English, (b) Modern Written Chinese, and (c) Putonghua helps explain the nature of the linguistic and acquisitional challenges involved. Economic forces and sociopolitical realities helped shape the 'mother tongue education' or 'dual Mol streaming' policy since September 1998. The book provides a critical review of the significant milestones and key policy documents from the early 1990s, and outlines the concerns of stakeholders at the receiving end. Another Mol debate concerns the feasibility and desirability of teaching Chinese in Putonghua (TCP). Based on a critical review of the TCP literature and recent psycholinguistic and neuroscience research, the language-in-education policy implications are discussed, followed by a few recommendations. Hongkongers of South Asian descent saw their life chances curtailed as a result of the post-1997 changes in the language requirements for gaining access to civil service positions and higher education. Based on a study of 15 South Asian undergraduate students' prior language learning experiences, recommendations are made to help redress that social inequity problem.

Technical questions and answers for job interview Offshore Oil & Gas Rigs Dec 20 2022 The job interview is probably the most important step you will take in your job search journey. Because it's always important to be prepared to respond effectively to the questions that employers typically ask at a job interview Petrogav International has prepared this eBooks that will help you to get a job in oil and gas industry. Since these questions are so common, hiring managers will expect you to be able to answer them smoothly and without hesitation. This eBook contains 273 questions and answers for job interview and as a BONUS web addresses to 218 video movies for a better understanding of the technological process. This course covers aspects like HSE, Process, Mechanical, Electrical and Instrumentation & Control that will enable you to apply for any position in the Oil and Gas Industry.

Building Communities of Engaged Readers Jan 17 2020 Reading for pleasure urgently requires a higher profile to raise attainment and increase children's engagement as self-motivated and socially interactive readers. Building Communities of Engaged Readers highlights the concept of 'Reading Teachers' who are not only knowledgeable about texts for children, but are aware of their own reading identities and prepared to share their enthusiasm and understanding of what being a reader means. Sharing the processes of reading with young readers is an innovative approach to developing new generations of readers. Examining the interplay between the 'will and the skill' to read, the book distinctively details a reading for pleasure pedagogy and demonstrates that reader engagement is strongly influenced by relationships between children, teachers, families and communities. Importantly it provides compelling evidence that reciprocal reading communities in school encompass: a shared concept of what it means to be a reader in the 21st century; considerable teacher and child knowledge of children's literature and other texts; pedagogic practices which acknowledge and develop diverse reader identities; spontaneous 'inside-text talk' on the part of all members; a shift in the focus of control and new social spaces that encourage choice and children's rights as readers. Written by experts in the literacy field and illustrated throughout with examples from the project schools, it is essential reading for all those concerned with improving young people's enjoyment of and attainment in reading.

International Journal of Innovation, Creativity and CHange, Volume 1, Issue 2, November 2013 Feb 22 2023 The International Journal of Innovation, Creativity and Change publishes scholarly work that promotes and fosters innovation, creativity and change in all fields of endeavour. The focus is on papers that will be influential in their field or across fields and will significantly advance understanding in those fields. All submission are peer reviewed.

Media and information literacy: policy and strategy guidelines Oct 14 2019

Human Development Report 2015 Jul 23 2020 This report takes a broad view of the link between work and human development. Work is a critical tool for economic growth and security, poverty reduction and gender equality. It enables full participation in society while affording people a sense of dignity and worth. Humans working together not only increase their material well-being, they also accumulate a wide body of knowledge that serves as the basis for cultures and civilizations. The report finds that work enhances human development when policies are taken to expand productive, remunerative and satisfying work opportunities. Workers' skills and potentials are enhanced, their well-being in terms of rights, safety and benefits are ensured with targeted interventions, and an agenda incorporating decent work, a new Social Contract and a Global Deal is pursued.

Health Literacy: Breakthroughs in Research and Practice Mar 31 2021 The development of better processes to relay medical information has enhanced the healthcare field. By implementing effective collaborative strategies, this ensures proper quality and instruction for both the patient and medical practitioners. Health Literacy: Breakthroughs in Research and Practice examines the latest advances in providing and helping patients and medical professionals to understand basic health information and the services that are most appropriate. Including innovative studies on interactive health information, health communication, and health education, this multi-volume book is an ideal source for professionals, researchers, academics, practitioners, and students interested in the improvement of health literacy.

Reading in the mobile era Dec 08 2021 Millions of people do not read for one reason: they do not have access to text. But mobile phones and cellular networks are transforming a scarce resource into an abundant one. Drawing on the analysis of over 4,000 surveys collected in seven developing countries and corresponding qualitative interviews, this report paints a detailed picture of who reads books and stories on mobile devices and why. The findings illuminate, for the first time, the habits, beliefs and profiles of mobile readers in developing countries. This information points to strategies to expand mobile reading and, by extension, the educational and socio-economic benefits associated with increased reading. Mobile technology can advance literacy and learning in underserved communities around the world. This report shows how.

International Perspectives on Older Adult Education May 01 2021 This important book builds on recent publications in lifelong learning which focus on learning and education in later life. This work breaks new ground in international understandings of what constitutes later life learning across diverse cultures in manifold countries or regions across the world. Containing 42 separate country/regional analyses of later life learning, the overall significance resides in insiders' conceptualisations and critique of this emerging sub-field of lifelong learning and adult education. International perspectives on older adult education provides new appreciation of what is happening in countries from Europe (14), Africa (10), the Americas (7), Asia (9) and Australasia (2), as authored by adult educators and/or social gerontologists in respective geographical areas. These analyses are contextualised by a thorough introduction and critical appraisal where trends and fresh insights are revealed. The outcome of this book is a never-before available critique of what it means to be an older learner in specific nations, and the accompanying opportunities and barriers for learning and education. The sub-title of research, policy and practice conveys the territory that authors traverse in which rhetoric and reality are interrogated. Coverage in chapters includes conceptual analysis, historical patterns of provision, policy developments, theoretical perspectives, research studies, challenges faced by countries and "success stories" of later life learning. The resultant effect is a vivid portrayal of a vast array of learning that occurs in later life across the globe. Brian Findsen is Professor of Education and Postgraduate Leader for Te Whiringa School of Educational Leadership and Policy, Faculty of Education, University of Waikato, Hamilton, New Zealand. Marvin Formosa is Head of the Department of Gerontology, Faculty for Social Wellbeing, University of Malta, and Director of the International Institute on Ageing (United Nations - Malta).

The Delusion of Knowledge Transfer Dec 16 2019 With the rise of the 'knowledge for development' paradigm, expert advice has become a prime instrument of foreign aid. At the same time, it has been object of repeated criticism: the chronic failure of 'technical assistance' – a notion under which advice is commonly subsumed – has been documented in a host of studies. Nonetheless, international organisations continue to send advisors, promising to increase the 'effectiveness' of expert support if their technocratic recommendations are taken up. This book reveals fundamental problems of expert advice in the context of aid that concern issues of power and legitimacy rather than merely flaws of implementation. Based on empirical evidence from South Africa and Tanzania, the authors show that aid-related advisory processes are inevitably obstructed by colliding interests, political pressures and hierarchical relations that impede knowledge transfer and mutual learning. As a result, recipient governments find themselves caught in a perpetual cycle of dependency, continuously advised by experts who convey the shifting paradigms and agendas of their respective donor governments. For young democracies, the persistent presence of external actors is hazardous: ultimately, it poses a threat to the legitimacy of their governments if their policy-making becomes more responsive to foreign demands than to the preferences and needs of their citizens.

Shaping the future we want Apr 12 2022

Understanding the Constructions of Identities by Young New Europeans Sep 05 2021 How do young people construct their identities in the complexity of their own country, belonging to the European Union, and being part of global society? This book is based on a unique empirical study of a thousand young people, aged between eleven and nineteen, from fifteen European countries. Covering East European states that joined the EU be

The Reading Lives of 8 to 11-Year-Olds 2005-2013 Mar 19 2020 This report focuses on children aged 8 to 11 and their enjoyment of reading, reading behaviour, and attitudes toward reading. It synthesises information from surveys that have been conducted since 2005, but most heavily exploits data from the fourth annual literacy survey conducted in November/December 2013 in which 10,946 8 to 11-year-olds participated. In addition, this report explores the link between reading, gender, and socio-economic background (assessed by free school meal uptake) for this age group and how certain subgroups of pupils are potentially doubly disadvantaged. Some general findings in this report include: (1) Nearly two-thirds (65.8%) of 8 to 11-year-olds enjoy reading either very much (34.4%) or quite a lot (31.4%); (2) Nearly three-quarters (72.8%) of 8 to 11-year-olds have a favourite book or story; (3) 84.6% of children aged 8 to 11 say that they have a book of their own at home; (4) Two-fifths (40.7%) read daily outside class, while over a third (34.7%) read a few times a week; (5) Nearly a quarter (22.8%) of 8 to 11-year-olds read for up to 10 minutes at a time, while another quarter (25.3%) read for up to 20 minutes; (6) When asked what types of materials they read outside class, most 8 to 11-year-olds say that they read text messages (56.4%), followed by magazines (51.6%) and fiction (50.5%); (7) A lot of 8 to 11-year-olds are avid readers of books; (8) Nearly 9 in 10 (87.0%) 8 to 11-year-olds have been given a book as a present, while 9 in 10 (92.7%) have also been to a library; and (9) Most 8 to 11-year-olds have positive attitudes toward reading. [The research for this report has informed the publication "How reading can help children escape poverty" produced by the Read On. Get On. coalition].

Networked Humanities Apr 19 2020 Of all the topics of interest in the digital humanities, the network has received comparatively little attention. We live in a networked society: texts, sounds, ideas, people, consumerism, protest movements, politics, entertainment, academia, and other items circulate in and through networks that come together and break apart at various moments. In these interactions, data sets of all sorts are formed, or at the least, are latent. Such data affect what the humanities is or might be. While there exist networked spaces of interaction for digital humanities work, considering in more detail how networks affect traditional and future goals of humanistic inquiry is a timely pursuit. Networked Humanities: Within and Without the University takes up this issue as a volume of collected work that asks these questions: Have the humanities sufficiently addressed the ways its various forms of work, as networks, affect other networks, within and outside of the university? What might a networked digital humanities be, or what is it currently if it does, indeed, exist? Can an understanding of the humanities as a series of networks affect--positively or negatively--the ways publics perceive humanities research, pedagogy, and mission? In addressing these questions, Networked Humanities offers both a critical and timely contribution to the spacious present and potential future of the digital humanities, both within academe and beyond. Contributors include Neil Baird, Jenny Bay, Casey Boyle, James J. Brown, Jr., Levi R. Bryant, Naomi Clark, Bradley

Dilger, Kristie S. Fleckenstein, Paul Gestwicki, Tarez Samra Graban, Jeffrey T. Grabill, Laurie Gries, Byron Hawk, John Jones, Nate Kreuter, Devoney Looser, Rudy McDaniel, Derek Mueller, Liza Potts, Jeff Pruchnic, Jim Ridolfo, Nathaniel Rivers, Jillian J. Sayre, Lars Söderlund, Clay Spinuzzi, and Kathleen Blake Yancey.

A Practical Guide to Financial Services Jul 15 2022 Financial services are an ever increasing part of the infrastructure of everyday life. From banking to credit, insurance to investment and mortgages to advice, we all consume financial services, and many millions globally work in the sector. Moreover, the way we consume them is changing with the growing dominance of fintech and Big Data. Yet, the part of financial services that we engage with as consumers is just the tip of a vast network of markets, institutions and regulators – and fraudsters too. Many books about financial services are designed to serve corporate finance education, focusing on capital structures, maximising shareholder value, regulatory compliance and other business-oriented topics. *A Practical Guide to Financial Services: Knowledge, Opportunities and Inclusion* is different: it swings the perspective towards the end-user, the customer, the essential but often overlooked participant without whom retail financial services markets would not exist. While still introducing all the key areas of financial services, it explores how the sector serves or sometimes fails to serve consumers, why consumers need protection in some areas and what form that protection takes, and how consumers can best navigate the risks and uncertainties that are inherent in financial products and services. For consumers, a greater understanding of how the financial system works is a prerequisite of ensuring that the system works for their benefit. For students of financial services – those aspiring to or those already working in the sector – understanding the consumer perspective is an essential part of becoming an effective, holistically informed and ethical member of the financial services community. *A Practical Guide to Financial Services: Knowledge, Opportunities and Inclusion* will equip you for both these roles. The editors and authors of *A Practical Guide to Financial Services: Knowledge, Opportunities and Inclusion* combine a wealth of financial services, educational and consumer-oriented practitioner experience.

Social Media Strategies for Dynamic Library Service Development Sep 24 2020 As social technologies continue to evolve, it is apparent that librarians and their clientele would benefit through participation in the digital social world. While there are benefits to implementing these technologies, many libraries also face challenges in the integration and usage of social media. *Social Media Strategies for Dynamic Library Service Development* discusses the integration of digital social networking into library practices. Highlighting the advantages and challenges faced by libraries in the application of social media, this publication is a critical reference source for professionals and researchers working within the fields of library and information science, as well as practitioners and executives interested in the utilization of social technologies in relation to knowledge management and organizational development.

Big Data Oct 26 2020 Promise, Application and Pitfalls

Children's Speech Sound Disorders Feb 16 2020 Speaking directly to experienced and novice clinicians, educators and students in speech-language pathology/speech and language therapy via an informative essay-based approach, *Children's Speech Sound Disorders* provides concise, easy-to-understand explanations of key aspects of the classification, assessment, diagnosis and treatment of articulation disorders, phonological disorders and childhood apraxia of speech. It also includes a range of searching questions to international experts on their work in the child speech field. This new edition of *Children's Speech Sound Disorders* is meticulously updated and expanded. It includes new material on Apps, assessing and treating two-year-olds, children acquiring languages other than English and working with multilingual children, communities of practice in communication sciences and disorders, distinguishing delay from disorder, linguistic sciences, counselling and managing difficult behaviour, and the neural underpinnings of and new approaches to treating CAS. This bestselling guide includes: Case vignettes and real-world examples to place topics in context Expert essays by sixty distinguished contributors A companion website for instructors at www.wiley.com/go/bowen/speechlanguagetherapy and a range of supporting materials on the author's own site at speech-language-therapy.com Drawing on a range of theoretical, research and clinical perspectives and emphasising quality client care and evidence-based practice, *Children's Speech Sound Disorders* is a comprehensive collection of clinical nuggets, hands-on strategies, and inspiration.

Landscapes of Specific Literacies in Contemporary Society Jan 21 2023 This volume makes a timely contribution to our understanding of literacy as a multi-faceted, complexly situated activity. Each chapter provides the reader with a fresh perspective into a different site for literate behaviour, approaches, design and relationships, and offers an exploration into the use of literacy theories to inform policy and practice, particularly in regard to curriculum. Bringing together international experts in the field, the contributing authors represent a wide variety of theoretical and research perspectives which cover literacy in various forms, including: • transformative literacy • survey literacy • academic literacies • information literacy in the workplace • digital literacy. *Landscapes of Specific Literacies in Contemporary Society* suggests that literacy curriculum needs to evolve from its current perspective if it is to cater for the demands of the 21st century contemporary globalised society. The book will be of key interest to researchers and academics in the fields of education, curriculum studies and the sociology of education, as well as to policy makers and literacy specialists.

Literacy in the Digital University Jun 02 2021 *Literacy in the Digital University* is an innovative volume bringing together perspectives from two fields of enquiry and practice: 'literacies and learning' and 'learning technologies'. With their own histories and trajectories, these fields have seldom overlapped either in practice, theory, or research. In tackling this divide head on, the volume breaks new ground. It illustrates how complementary and contrasting approaches to literacy and technology can be brought together in productive ways and considers the implications of this for practitioners working across a wide range of contexts. The book showcases work from well-respected authorities in the two fields in order to provide the foundations for new conversations about learning and practice in the digital university. It will be of particular relevance to university teachers and researchers, educational developers and learning technologists, library staff, university managers and policy makers, and, not least, learners themselves, particularly those studying at post-graduate level.

Geoscience for the Public Good and Global Development Jan 09 2022 "Offers overview of applications of geosciences to sustainable development and geophilanthropic efforts worldwide, and offers advice to guide creation of development projects. Primacy of geologic input to all development activities is highlighted along with problems that are encountered and environmental issues that must be addressed" --

Multiple Perspectives in Risk and Risk Management Nov 14 2019 This proceedings book presents a multidisciplinary perspective on risk and risk management. Featuring selected papers presented at the European Risk Research Network (ERRN) 8th European Risk Conference "Multiple Perspectives in Risk and Risk Management" held in Katowice, Poland, it explores topics such as risk management systems, risk behaviors, risk culture, big data and risk reporting and regulation. The contributors adopt a wide variety of theoretical approaches and either qualitative or quantitative methodologies. Contemporary companies operate in a highly dynamic environment, accompanied by the constant development of the information technology, making decision-making processes highly complex and increasing the risk related to company performance. The European Risk Research Network (ERRN) was established in 2006 with the aim of stimulating cross-disciplinary research in the area of risk management. The network includes academics and industry experts from the fields of accounting, auditing, financial economics and mathematical finance. To keep the network lively and fruitful, regular "European Risk Conferences" are organized to present papers from a broad spectrum of risk and risk management areas. Featuring contributions for Italy, South Africa, Germany and Poland, this proceedings book is a valuable reference resource for students, academics, and practitioners in risk and risk management

technological process. This course covers aspects like HSE, Process, Mechanical, Electrical and Instrumentation & Control that will enable you to apply for any position in the Oil and Gas Industry.

Research 2.0 and the Impact of Digital Technologies on Scholarly Inquiry Jun 21 2020 The academic landscape has been significantly enhanced by the advent of new technology. These tools allow researchers easier information access to better increase their knowledge base. Research 2.0 and the Impact of Digital Technologies on Scholarly Inquiry is an authoritative reference source for the latest insights on the impact of web services and social technologies for conducting academic research. Highlighting international perspectives, emerging scholarly practices, and real-world contexts, this book is ideally designed for academicians, practitioners, upper-level students, and professionals interested in the growing field of digital scholarship.

The Art of Collectivity Jan 29 2021 Amidst epidemics of youth alienation and cultural polarization, community-based artistic practices are sprouting up around the world as antidotes to policies of austerity and social exclusion. Rejecting the radical individualism of the neoliberal era, many artistic projects promote collectivity and togetherness in navigating challenges and constructing shared futures. The Art of Collectivity is about how one such creative social program deployed this approach in service of a post-neoliberal vision. Focusing on a national social circus initiative launched by a newly elected Ecuadorean government to help actualize its "citizens' revolution," the book explores the intersection between global cultural politics, participatory arts, collective health, and social transformation. The authors include scholars and practitioners of community arts, humanities, social sciences, and health sciences from the Global North and Global South. Sensitive to hierarchical binaries such as research/practice, north/south, and art/science, they work together to provide a multifaceted analysis of the way cultural politics shape policy, pedagogy, and aesthetic sensibilities, as well as their socio-cultural and health-related effects. The largest study of social circus to date, combining detailed quantitative, qualitative, and arts-based research, The Art of Collectivity is a timely contribution to the study of cultural policies, critical pedagogies, collective art-making, and community development.

The New Balanced Literacy School Feb 10 2022 Create a new approach to balanced literacy grounded in research-based best practices. This book infuses best practices of the new balanced literacy model through the lens of Common Core, with support on read-alouds, guided reading, language and literacy centers, word walls to language walls, independent reading and writing, and classroom libraries. It also provides the "how" for novice and veteran K-8 teachers, administrators, school literacy teams. With the daily routine "110 Minutes of Literacy" the Common Core State Standards will be easy to implement in instruction.

Encyclopedia of Ephemera May 21 2020 The joy of finding an old box in the attic filled with postcards, invitations, theater programs, laundry lists, and pay stubs is discovering the stories hidden within them. The paper trails of our lives -- or ephemera -- may hold sentimental value, reminding us of great grandparents. They chronicle social history. They can be valuable as collectibles or antiques. But the greatest pleasure is that these ordinary documents can reconstruct with uncanny immediacy the drama of day-to-day life. The Encyclopedia of Ephemera is the first work of its kind, providing an unparalleled sourcebook with over 400 entries that cover all aspects of everyday documents and artifacts, from bookmarks to birth certificates to lighthouse dues papers. Continuing a tradition that started in the Victorian era, when disposable paper items such as trade cards, die-cuts and greeting cards were accumulated to paste into scrap books, expert Maurice Rickards has compiled an enormous range of paper collectibles from the obscure to the commonplace. His artifacts come from around the world and include such throw-away items as cigarette packs and crate labels as well as the ubiquitous faxes, parking tickets, and phone cards of daily life. As this major new reference shows, simple slips of paper can speak volumes about status, taste, customs, and taboos, revealing the very roots of popular culture.

Proceedings of International Seminar on Application of Communication and Information Technology in Library Oct 06 2021 The proceeding focuses on the adoption and use of information and communication technology that have resulted in the globalization of information and knowledge resources in modern libraries. The diverse set of technological tools and resources to create, communicate, disseminate, store and manage information have been discussed. Other topics include semantic tools and techniques, collection development, data and content management in digital era, the role of the digital librarian and the next generation library management, ethics for professionals, licensing issues, information access, repository projects for organizations. The book covers information management, problems and prospects of digitization in scientific institutes, emerging technologies in e-library & technology enhanced e-learning, ethics for library professionals & users in the digital environment, technology enhanced services in digital environment.

Handbook of Research on Human Social Interaction in the Age of Mobile Devices Feb 27 2021 Digital innovations, such as mobile technologies, have had a significant impact on the way people relate to one another, as well as the way they obtain and distribute information. As mobile devices continue to evolve, it has become easier to socialize; however, these mobile advancements have also made certain aspects of interaction more complex. The Handbook of Research on Human Social Interaction in the Age of Mobile Devices features an interdisciplinary perspective on mobile innovations and the use of this technology in daily life. Investigating the successes, issues, and challenges of the utilization of mobile technology, this handbook of research is a comprehensive reference source for professionals, educators, policymakers, and students interested in the impact these devices have on digital interaction, media, and communication.

Future Earth Aug 16 2022 Earth now is dominated by both biogeophysical and anthropogenic processes, as represented in these two images from a simulation of aerosols. Dust (red) from the Sahara sweeps west across the Atlantic Ocean. Sea salt (blue) rises into the atmosphere from winds over the North Atlantic and from a tropical cyclone in the Indian Ocean. Organic and black carbon (green) from biomass burning is notable over the Amazon and Southeast Asia. Plumes of sulfate (white) from fossil fuel burning are particularly prominent over northeastern North America and East Asia. If present trends of dust emissions and fossil fuel burning continues in what we call the Anthropocene epoch, then we could experience high atmospheric CO₂ levels leading to unusual warming rarely experienced in Earth's history. This book focuses on human influences on land, ocean, and the atmosphere, to determine if human activities are operating within or beyond the safe zones of our planet's biological, chemical, and physical systems. Volume highlights include: • Assessment of civic understanding of Earth and its future • Understanding the role of undergraduate geoscience research and community-driven research on the Anthropocene • Effective communication of science to a broader audience that would include the public, the K-12 science community, or populations underrepresented in the sciences • Public outreach on climate education, geoscience alliance, and scientific reasoning Future Earth is a valuable practical guide for scientists from all disciplines including geoscientists, museum curators, science educators, and public policy makers. This volume was made possible with the support of the National Science Foundation through the National Center for Earth-surface Dynamics (EAR-0120914) and the Future Earth Initiative (DRL-0741760). Any opinions, findings, and conclusions or recommendations expressed in this publication are those of the author(s) and do not necessarily reflect the views of the National Science Foundation.

Encyclopedia of Human Services and Diversity Nov 07 2021 Encyclopedia of Human Services and Diversity is the first encyclopedia to reflect the changes in the mission of human services professionals as they face today's increasingly diverse service population. Diversity encompasses a broad range of human differences, including differences in ability and disability, age, education level, ethnicity, gender, geographic origin, religion, sexual orientation, socioeconomic class, and values. Understanding the needs and problems of Asian Americans, Hispanic Americans, the deaf, the blind, the LGBT community, and many other groups demands an up-to-date and cutting-edge reference. This three-volume encyclopedia provides human services students, professors, librarians, and practitioners the reference information they need to meet the needs of an increasingly diverse population. Features: 600 signed entries are organized A-to-Z across three volumes. Entries, authored by key figures in the field, conclude with cross references and further readings. A Reader's Guide groups related articles within broad, thematic areas, such as aging, community mental health, family and child services, substance abuse, etc. A detailed index, the Reader's Guide, and cross references combine for search-and-browse in the electronic version. A helpful Resource Guide guides students to classic books, journals, and web sites, and a glossary assists them with the terminology of the field. Available in both print and electronic formats, Encyclopedia of Human Services and

Diversity is an ideal reference for students, practitioners, faculty and librarians.

Library Technology and Digital Resources Nov 26 2020 In the last decade library collections have rapidly evolved from a predominance of print books and journals to an ever growing mix of digital and print resources. Library patrons are predominately served by support staff that is expected to know how to help patrons select and use digital resources. Yet most library support staff (LSS) has not had training to become proficient in finding, using, and instructing others in the abundance of the digital resources of websites, databases, e-texts, digital libraries and their related technologies. *Library Technology and Digital Resources: An Introduction for Support Staff* is both a text for professors who teach in library support staff programs and an introductory reference manual for support staff who work in libraries. This book will guide the LSS to be able to: Distinguish key features and enhancements found among vendors and providers of digital libraries, digital collections, databases, and e-texts; Plan, budget, fund and write grants for digital resources; Understand the complexity and options of licensing and usage agreements for digital resources; Know copyright permissions and acceptable use guidelines for digital resources. Understand the basic technologies that support library digital resources including network structures, software applications, and protocols; Distinguish between directories and search engines as they relate to digital resources as well as be able to employ advance search skills effectively; Explore the resources of global, national, and state digital libraries and their collections; Use government databases and other digitized systems and information sources; Find exemplary digital resources though other agencies such as museums, university collections and other sources that librarians can share with patrons. Create local digital resources of primary and historical materials and artifacts with metadata and cataloging for searchable access. Interpret meaning from library digital resources using visual literacy skills. Promote library digital resources through a variety of means including social media and online options.

Library and Information Science Research in Asia-Oceania: Theory and Practice Jun 14 2022 Historically, the major Library and Information Science (LIS) research-producing centers of the world have largely been the universities and information institutions of North America, the United Kingdom, and Europe. This is changing with the growth of Asian economies, universities, and information industries. *Library and Information Science Research in Asia-Oceania: Theory and Practice* presents evolving and emerging research and development in the field of library and information science (LIS) in diverse countries in Asia-Oceania as the region continues to develop. This book is intended as a useful resource for LIS researchers, scholars, students, professionals, and practitioners, and is an appropriate text for courses in LIS. In addition, anyone interested in understanding the LIS field in the region will find this book a fascinating and enlightening read.

Health Literacy May 13 2022 As societies grow more complex and people are increasingly bombarded with health information and misinformation, health literacy becomes essential. People with strong health literacy skills enjoy better health and well-being, while those with weaker skills tend to engage in riskier behavior and have poorer health. With evidence from the recent European Health Literacy Survey, this report identifies practical and effective ways public health and other sector authorities and advocates can strengthen health literacy in a variety of settings, including educational settings, workplaces, marketplaces, health systems, new and traditional media and political arenas. The report can be used as a tool for spreading awareness, stimulating debate and research and, above all, for informing policy development and action.

Individual Behaviors and Technologies for Financial Innovations Sep 17 2022 This book offers comprehensive examination of research on the relevance of individual behavior and technology to financial innovations. The chapters cover current topics in finance including integrated reporting, people finance, crowdfunding, and corporate networks. It provides readers with an organized starting point to explore individual behaviors and new technologies used in financial innovations. The explicit and growing speed of the spread of new technologies has hastened the emergence of innovation in the field of finance. Topics like the Internet of Things, semantic computing and big data finance are motivating the construction of financial tools that translate into new financial mechanisms. This book strives help readers better understand the dynamic of the changes in financial systems and the proliferation of financial products. *Individual Behaviors and Technologies for Financial Innovations* is organized in 16 chapters, organized in three parts. Part I has eight chapters that review the research on gender differences in attitudes about risk and propensity to purchase automobile insurance, financial literacy models for college students, wellness and attitude of university students in the use of credit cards, impact of programs income distribution and propensity to remain in employment, financial literacy and propensity to resort to informal financing channels, risk behavior in the use of credit cards by students. Part II reviews the research on financing for startups and SMEs, exploring funding through crowdfunding platform, operating credit unions, and using networks of friends to finance small businesses outside the domestic market. The four chapters of Part III describe contexts of financial innovation in listed companies, including society's demands on their behavior - we discuss motivations for companies to participate in corporate sustainability indexes, corporate performance through their profile of socially responsible investments, influence of networks of social relations in the formation of boards, and management of companies, and also the precariousness of financial decisions in large companies, as well as the role of the internet in corporate communication with the market.

Women in Sufism Dec 28 2020 Exploring the diverse myriad of female religious identities that exist within the various branches of the Moroccan Sufi Order, Q?diriyya B?dsh?shiyya, today, this book evidences a wide array of religious identities, from those more typical of Berber culture, to those characterised by a 'sober' approach to Sufism, as well as those that denote New Age eclecticism. The book researches the ways in which religious discourses are corporeally endorsed. After providing an overview of the Order historically and today, enunciating the processes by which this local tar?qa from North-eastern Morocco has become the international organization that it is now, the book explores the religious body in movement, in performance, and in relation to the social order. It analyses pilgrimage by assessing the annual visit that followers of Hamza B?dsh?sh make to the central lodge of the Order in Mad?gh; it explores bodily religious enactments in ritual performance, by discussing the central practices of Sufi ritual as manifested in the B?dsh?shiyya, and delves attention into diverse understandings of faith healing and health issues. *Women and Sufism* provides a detailed insight into religious healing, sufi rituals and sufi pilgrimage, and is essential reading for those seeking to understand Islam in Morocco, or those with an interest in Anthropology and Middle East studies more generally.
