Land resumption in Hong Kong, which involves involuntary displacement in contemporary development projects, deliberately targets nonindigenous villages, where many residents are landless farmers. In this article, we examine the risks and impacts associated with such displacement of the nonindigenous villagers through a grounded theory approach. Interviews were conducted with nonindigenous villagers who were either in a pre- or in a post-relocation state as well as with activists who condemn the current development projects in Hong Kong. Our major findings are that displacement risks and impacts of the nonindigenous villagers can be understood against the background of five interrelated factors: marginalization by nonindigenous status, demographic characteristics, economic impacts, mental health, and community attachment. Displacement loss unfolds particularly strong for the landless, often elderly, farmers. While Hong Kong is a highly developed area, its nonindigenous villagers largely face the negative outcomes of development projects, similar to the landless people in the developing world. A City Mismanaged traces the collapse of good governance in Hong Kong, explains its causes, and exposes the damaging impact on the community's quality of life. Leo Goodstadt argues that the current well-being and future survival of Hong Kong have been threatened by disastrous policy decisions made by chief executives and their principal officials. Individual chapters look at the most shocking examples of mismanagement: the government's refusal to implement the Basic Law in full; official reluctance to halt the large-scale dilapidation of private sector homes into accommodation unfit for habitation; and ministerial toleration of the rise of new slums. Mismanagement of economic relations with Mainland China is shown to have created severe business losses. Goodstadt's riveting investigations include extensive scandals in the post-secondary education sector and how lives are at risk because of the inadequate staff levels and limited funding allocated to key government departments. This book offers a unique and very powerful account of Hong Kong's struggle to survive. 'Goodstadt demonstrates how the neglect of social rights in managing the SAR has brought about serious consequences through the discussion of housing, medical services, and education. A highly readable title with a lot of interesting arguments for those who really care about Hong Kong.' —Lui Tai-lok, Department of Asian and Policy Studies, Education University of Hong Kong

'Goodstadt gives a well-grounded and relentless rebuke of the HKSAR government for failing to safeguard lives, quality of living and the interests of its people in the past twenty years. It is a poignant siren that calls for reflection and correction.' —Christine M. S. Fang, Department of Social Work and Social Administration, The University of Hong Kong

'Goodstadt utilizes his long experience in public policy in Hong Kong to interpret the city's mismanagement. He supplies a devastating critique of the fallacy of the approach taken by the Chief Executives and the senior leaders.' —David R. Meyer, Olin Business School, Washington University in St. Louis

What You See Is What You Hear develops a unique model of analysis that helps students and advanced scholars alike to look at audiovisual texts from a fresh perspective. Adopting an engaging writing style, the author draws an accessible picture of the field, offering several analytical tools, historical background, and numerous case studies. Divided into five main sections, the monograph covers problems of definitions, history, and most of all analysis. The first part raises the main problems related to audiovisuality, including taxonomical and historical questions. The second part provides the bases for the understanding of audiovisual creative communication as a whole, introducing a novel theoretical model for its analysis. The next three part focus elaborate on the model in all its constituents and with plenty of case studies taken from the field of cinema, TV, music videos, advertising and other forms of audiovisuality. Methodologically, the book is informed by different paradigms of film and media studies, multimodality studies, structuralism, narratology, "auteur theory" in the broad sense, communication studies, semiotics, and the so-called "Numanities." *What You See Is What You Hear* enables readers to better understand how to analyze the structure and content of diverse audiovisual texts, to discuss their different idioms, and to approach them with curiosity and critical spirit.

The HKFE Clearing Corporation Limited (HKCC) observes the CPSS/IOSCO Principles for Financial Market Infrastructures (PFMI). It has a sound, coherent and transparent legal basis. As an integral part of the Hong Kong Exchanges and Clearing Limited (HKEX Group), the HKCC has a comprehensive and adequate risk management framework to address financial, business, and operational risks. Participant assets as well as HKCC's collaterals are safely kept in several banks and regulated central securities depositories. The credit and liquidity risks are minimized by having a robust risk management framework, including rigorous stress testing methodology and access to qualifying liquid resources. Furthermore, the HKCC has clear rules and procedures to handle and manage a participant's default procedures. Moreover, the HKCC has established risk management framework to handle operational risk, including cyber risk, and business continuity management that addresses events posing significant risk of operational disruption.

This book examines the socio-political conflicts which have arisen since Hong Kong's return to China and confronts the fundamental problems in the design of the One Country, Two Systems (OCTS) Model. It considers not only the issue of democratization, but also the institutional fractures in the executive-dominant political system and the disconnection between the executive and the legislature. It describes the drastic changes which have affected social mobilization and political activism in Hong Kong, as well as the pattern of interaction between the government and civil society. This edited volume brings together a team of cutting-edge researchers to examine the operation of the

One Country, Two Systems (OCTS) Model in Hong Kong over the past 20 years. The discussion and analysis offered by the contributors will cast light on social and political tensions and conflicts that will continue to unfold in the coming years. This timely account, published on the 20th anniversary of the handover, will be a valuable read for students and scholars of Chinese and East Asian studies. Sophisticated banking is vital for modern society to function and prosper. Banks lend to individuals and corporations but do so after carefully exploring the risks they undertake to each customer. This book examines the important role of lending in banking operations and how banks can implement safe and effective loan initiatives. Banks rely on lending to generate profits, but it can be a risky venture. It is important for banking professionals to understand how to mitigate those risks. Bank Lending from the Hong Kong Institute of Bankers discusses a variety of topics that impact a bank's loan strategy. This is an essential read for candidates studying for the HKIB Associateship Examination and those who want to acquire expert knowledge of Hong Kong's bank lending system. Topics covered in this book include: Assessing and reducing lending risk Understanding the customer through financial statements Using ratios to determine risk Setting up an internal structure to reduce risk Pricing and managing loans Dah Sing Bank is delighted to sponsor this resourceful book. The Dah Sing Group is a leading financial services group in Hong Kong, active in providing banking, insurance, financial, and other related services in Hong Kong, Macau, and the People's Republic of China. The Dah Sing Group has gained a reputation as one of the most progressive and innovative financial services groups. Keys to its success are the strength of the Dah Sing management team and the group's commitment to serving its customers.

Torren Taylor has a gorilla problem. The birthmark on his back says he is supposed to be the new Kong, but he wants nothing to do with his people. Shunning their traditions means his silverback is out of control and on a one-way track to crazy-town. He accepted his shortened life a long time ago, but right now all he wants to do is live long enough to for a couple last bucket list items. When a rare beauty shows up at his door and offers to keep his animal steady for two hundred bucks a week, well, he's mighty tempted to pay to prolong his life. Especially if it means spending time with Candace, who seems to have a knack for calming dominant men. She's a good girl gone bad, and he wants to corrupt her even further. But something's brewing against his crew, and drawing her in closer will put her at risk. And now Torren is torn on one important decision: be selfish and live longer, or shorten Candace's life with the danger building around the Sons of Beasts. Candace Sumner needs a change. She's back in Foxburg paying off big debts and taking desperate measures to do so. She had to give up her dreams to come back to her hometown, and now she wants a break from the monotony. And maybe a friend or two wouldn't hurt either. An offer to keep a local silverback shifter steady sounds like an adventure, but when she sees Torren for the first time, her plans at aloofness are squashed. He is the type of man who is the perfect combination of sweet and deadly that could finally make her feel safe in her life. Too bad he's going crazy, and his crew could go down in flames at any second. Candace wanted an adventure, but she didn't bargain for love, betrayal, and a group of the worst-best friends a shifter like her could ask for. Content Warning: Explicit love scenes, naughty language, and piles of sexy shifter secrets. Intended for mature audiences. In this book the world's leading risk researchers explore all aspects of trust as it relates to risk management and communication. Drawing on a wide variety of disciplinary approaches and empirical case studies (on topics such as mobile phone technology, well-known food accidents and crises, wetland management, smallpox vaccination, cooperative risk management of US forests and the disposal of the Brent Spar oil drilling platform), this is the most thorough and up-to-date examination of trust in all its forms and complexities. The book integrates diverse research traditions and provides new insights into the phenomenon of trust. Factors that lead to the establishment and erosion of trust are identified. Insightful analyses are provided for researchers and students of environmental and social science and professionals engaged in risk management and communication in both public and private sectors. As the reversion date approaches, increasing attention has focused on how the territory will fare under China and how U.S. economic and security interests could be affected. U.S. economic presence in the territory is substantial, and Hong Kong's fate has significant implications for broader U.S.-China relations. You asked us to focus on one key issue-whether U.S. export control policy toward Hong Kong will adequately protect U.S. national security and nonproliferation interests after Hong Kong's reversion to China. You raised concerns about the potential risks and consequences of continuing to export sensitive technologies to the territory after reversion, given China's past proliferation behavior. This report outlines (1) how U.S. export controls are currently applied to Hong Kong as compared with China, (2) planned U.S. export control policy toward Hong Kong after reversion, and (3) possible safeguards and monitoring efforts to protect U.S. nonproliferation interests. These include insecure employment resulting from ever more volatile labour markets, new family and gender relationships resulting from the growing participation of women in the labour market, and the many problems resulting from very much longer human life expectancy. Whereas once social policy had to be in step with a standardised, relatively stable and predictable life course, it now has to cope with non-standardised individual preferences, life courses and families, and the consequent increased risks and uncertainties. This book examines these new life courses and their impact on social policy across a range of East Asian societies. It shows how governments and social welfare institutions have been slow to respond to the new challenges. In response, we propose a life-course sensitised policy as an approach to manage these risks. Overall, the book provides many new insights which will assist advance social policy in East Asia. Fintech offers automation opportunities for financial institutions, and such automation will in most cases make banks more competitive and lower their labor needs. The Hong Kong government has actively embraced fintech to ensure competitiveness, and its regulation tracks leading international positions on ICOs, cryptocurrency and electronic payment. However, Hong Kong regulators have not facilitated fintech activities that would stimulate the local economy, such as equity crowdfunding. Automation will generally translate into a reduction of human labor, particularly in mid-level jobs. In a large and varied economy, persons laid off from jobs at banks can seek engagement elsewhere. This is not necessarily true in an IFC with a less diversified economy. Hong Kong presents the highly unusual case of persons in a small IFC who have access to a large and diverse economy in mainland China, yet may refuse to seek new positions in the larger workplace for cultural or political reasons. The Hong Kong government has blithely followed a "market leads, government facilitates" philosophy of *laissez faire* for decades and thus also has failed to prepare for the social costs of fintech. While such preparation would indeed constitute social planning, an activity generally discouraged in Hong Kong, circumstances dictate that the HKSAR government

begin to act socially, rather than merely facilitate the largest businesses. This Selected Issues paper analyzes Hong Kong Special Administrative Region (SAR) banks' exposure to nonbanking businesses in Mainland China. Hong Kong SAR banks are generally less exposed to riskier Mainland businesses. Despite that, a sharp deterioration in the balance sheet of Mainland businesses, as well as a sharper-than-expected downturn in the Mainland economy could negatively affect Hong Kong SAR banks, raising debt at risk well above suggested estimates. As Hong Kong SAR banks generally have sizable buffers against downside risks, the best approach to such a scenario is vigilance, including maintaining high origination and underwriting standards. A competing risk hazard model is employed to examine the reasons for Hong Kong's Growth Enterprise (GEM) companies transferring to the Main Board (MB) in the period 2000-2012. In our sample during the period 21 companies or 15% of the original stock moved up to the MB. The modal life expectancy of a GEM company was about eight years. Companies that did not move up to the MB were at a small risk of delisting due to long term suspension or liquidation, but the great majority just remained where they were. Regarding the factors behind transfer to the MB, of the 129 companies listed on the GEM in the period, we find that companies with higher net profit and greater product market power were more likely to graduate in the following year. However, companies with lower growth, higher financial risk and those audited. According to the statistics from the Hong Kong Police, around 6000 juveniles (aged 7 to 15) were arrested each year in the last ten years. Although not all these young people arrested were convicted as delinquents, the problem of youth-at-risk has drawn attention from the public and the government. Various Western and local theories have been offered to account for the problem. Some commonly recognized categories of at-risk youth are youth gangs, young substance abusers, school bullies, and cautioned juveniles. These young people are usually perceived as having an impulsive nature; they require welfare services rather than punishment as criminals. This volume is a collection of chapters covering various aspects of the youth problem. Besides examining the causes of the problem and the principles behind the solution, different and effective approaches in working with the various categories of at-risk youths are introduced. The overall aim is to help this group of young people to lead a healthy life and integrate into society as contributing members. The book contains both theory and practice, and is suitable for social work students and professionals. In *Planning Asian Cities: Risks and Resilience*, Stephen Hamnett and Dean Forbes have brought together some of the region's most distinguished urbanists to explore the planning history and recent development of Pacific Asia's major cities. They show how globalization, and the competition to achieve global city status, has had a profound effect on all these cities. Tokyo is an archetypal world city. Singapore, Hong Kong and Seoul have acquired world city characteristics. Taipei and Kuala Lumpur have been at the centre of expanding economies in which nationalism and global aspirations have been intertwined and expressed in the built environment. Beijing, Hong Kong and Shanghai have played key, sometimes competing, roles in China's rapid economic growth. Bangkok's amenity economy is currently threatened by political instability, while Jakarta and Manila are the core city-regions of less developed countries with sluggish economies and significant unrealized potential. But how resilient are these cities to the risks that they face? How can they manage continuing pressures for development and growth while reducing their vulnerability to a range of potential crises? How well prepared are they for climate change? How can they build social capital, so important to a city's recovery from shocks and disasters? What forms of governance and planning are appropriate for the vast mega-regions that are emerging? And, given the tradition of top-down, centralized, state-directed planning which drove the economic growth of many of these cities in the last century, what prospects are there of them becoming more inclusive and sensitive to the diverse needs of their populations and to the importance of culture, heritage and local places in creating liveable cities? Abstract: [?] Risk and needs assessments are actuarial based instruments that aim to evaluate an (1) offender's risks including the risk of reoffending, (2) criminogenic needs so they can be targeted in treatment and (3) offender responsivity inclusive of the learning style, motivation, abilities and strengths of the offender (Andrews, Bonta and Wormith, 2011, 735). Since 2006, looking to Western nations as exemplars, the HK Security Bureau's policy initiatives have introduced a Risk and Needs Assessment Protocol for all local young offenders, and local adult offenders with sentences of two years and above. But one has to question how the policy transfer applies here in Hong Kong. What can Hong Kong's criminal justice policy makers and practitioners adapt from research conducted in Canada and the United States? Is there anything HK officials can learn from other jurisdictions, both in terms of experiences implementing risk needs tools and the wider socio-cultural context under which such implementation takes place? This study has provided some preliminary answers to these questions through critical analysis and expert interviews. Subsequent analysis on the definition of risk and need under the HK CSD's protocol outlined a further need for a definition of the responsivity principle. Concerns over the content of responsivity enhancement programs along with its effects on the voluntary participation of young offenders were also discussed in this analysis. Since the initial consultancy was commissioned by the CSD in 2002 to empirically develop and refine the protocol, a follow up study was much needed to suggest improvements. This study has served to fulfill this goal by suggesting improvements in addressing class, gender and racial disparity along with suggestions on operational excellence. Specifically, interviews with leading Canadian risk assessment experts including criminologists and

practitioners highlighted four main challenges and three main lessons for HK CSD to examine (p. 57-58). Interviews with Hong Kong risk/needs assessment experts including criminologist and HK CSD practitioners help provide clarification on the risk/need assessment process and how rehabilitative programs operate. Additional analysis on the risk/need assessment instrument used in Hong Kong along with an examination of the questions used by assessors was subsequently conducted. The result challenges the CSD's Risks and Needs Assessment and Management Protocol for Offenders as a "scientific and evidence based approach to prison management and offender rehabilitation" (CSD Booklet, 201, 3). This conclusion is based on the many social assumptions made on offenders found in the assessment tool and ambiguous design of questions used to evaluate criminogenic need. Erik Banks (CT) joined XL Capital's weather/energy risk management subsidiary, Element Re, as a Partner and Chief Risk Officer in 2001. Current concerns arise from prolific growth in the use of derivatives by financial institutions for credit risk transfer, the scale of which some national authorities find disquieting. However, attention in Hong Kong applies to a wholly different setting, springing from its prominent market in listed covered warrants. The regulatory regime for these instruments is fractured, porous, and conflicts with precepts of international practice to which the territory nonetheless subscribes. Primary oversight is entrusted to the Stock Exchange of Hong Kong, a body neither equipped nor inclined to perform the function authoritatively. Slender, variable disclosure requirements do little to inform participants as to the balance of risk and reward inherent in these products, and since most warrant buyers are non-professional individuals, a pronounced market correction would create a significant moral hazard for Hong Kong's government. Explores the growth by acquisition and divestiture of the long-lived and controversial Hong Kong trading firm Jardine Matheson. The importance of managing credit and credit risks carefully and appropriately cannot be overestimated. The very success or failure of a bank and the banking industry in general may well depend on how credit risk is handled. Banking professionals must be fully versed in the risks associated with credit operations and how to manage those risks. This up-to-date volume is an invaluable reference and study tool that delves deep into issues associated with credit risk management. Credit Risk Management from the Hong Kong Institute of Bankers (HKIB) discusses the various ways through which banks manage risks. Essential for candidates studying for the HKIB Associateship Examination, it can also help those who want to acquire a deeper understanding of how and why banks make decisions and set up processes that lower their risk. Topics covered in this book include: Active credit portfolio management Risk management, pricing, and capital adequacy Capital requirements for banks Approaches to credit risk management Structural models and probability of default Techniques to determine loss given default Derivatives and structured products Research Paper (undergraduate) from the year 2014 in the subject Economics - Finance, grade: 97.0, Westminster College, language: English, abstract: As a native of Hong Kong, I spent my entire adolescence in the changing socio-political atmosphere of the city, but have never researched in detail the financial risks that the city might have or what the economy is like in Hong Kong.
