Displaced Heritage

The Clothes on Our Backs Jun 15 2022 Jews had long been active in the clothing trade in Europe, developing new production and retail methods and excelling as designers. However, in the UK clothes production was mostly conservative and design was not a concept. What happened to these Jews in the clothing industry after the Nazis came to power in 1933, bent on ridding Germany of Jews? Many found asylum in Britain, where soon the refugee owners of Kangol and other firms were employing thousands of British workers at a time of dreadfully high unemployment. And when war broke out, it was Kangol who made the berets for the British army and other forces. British companies started to recognise what the refugees could offer: Pringle of Scotland for one could see the benefits of hiring an Austrian refugee designer, their first. It was he who thought up the twinset which became a huge commercial success. The refugees brought new technology, new display methods, a different attitude to export and much more. It was no wonder then that by the end of the war the refugee clothiers were recognised as having made a disproportionate contribution to the economy. Just one who was honoured was Miki Sekers, who was made an MBE in 1955 for services to the fashion industry. Additionally, to show their gratitude to the land that had saved their lives and given them hope, several became major patrons to the British arts scene. Harry Djanogly, supplier of clothing to M & S and a major donor to medical and educational projects also, was knighted for his services to philanthropy in 1993. Here Anna Nyburg tells their stories.

Naval Ship Models of World War II in 1/1250 and 1/1200

Scales Jul 04 2021 The origins of 1/1250 and 1/200 scale models can be traced back to the first years of the twentieth

century and their use as identification aids by the military during the First World War. When peace came the manufacturers aimed their increasingly sophisticated products at collectors, and ever since then acquiring, enhancing, modifying or scratch-building miniature ship models has been an avidly pursued hobby around the world. This new book focusses on models of the ships of the Second World War, probably the most popular subject for miniature model collectors, and the author, a well-known modeller himself, addresses all the practical issues that might confront those many collectors who like to enhance, convert, and modify their models, or even scratch-build models of ships not commercially available. The book covers both Allied and Axis warships, naval airplanes, merchant conversions and even an Italian armed schooner, and provides historic and technical information on the ships represented as well as practical advice on modelling them. The latter is extensive with twenty-five chapters covering everything from initial production techniques such as spin casting, silicon mould casting, resin casting, die-casting, plastic mould injection, and 3D printing through techniques for enhancing and modifying models to eventually researching and scratch-building an uncommon ship or type. The focus is always on particular vessels and the vast array covered by the author builds into a fascinating panorama of the vessels that fought across the world's oceans in that era. The combination of intriguing background and historical information, combined with detailed practical information and more than 300 stunning photographs will make this book irresistible to any collector or modeller and, indeed, to anyone with an interest in the navies of the Second World War.

Sellafield Stories Jul 16 2022 Sellafield Stories is the largest Oral History Project conducted in the UK. It was started by Jenni Lister, of Cumbria Record Office & Local Studies Library,

and was funded by the BNFL. Through the personal life stories of 30 people who lived, worked and built the complex SELLAFIELDS STORIES tells the true story of the Sellafields Nuclear Plant that has been at the heart of the Nation's story for the last 60 years. First set up in the aftermath of World War II to develop Britain's nuclear weapons, it was not until 1957 that it was given over to nuclear power, kick starting a revolution in post war energy. Since then it has been the site of protests, controversy and debate. Today it is still the country's biggest single industrial site employing 13,500 people.

Barrow-in-Furness in the Great War May 14 2022 This book is about how Barrow's output of war materials was vital to the Great War effort, and it is about the Barrovians and men from the surrounding south Lakeland area - from all walks of life - who fought abroad, and the area's women war heroes. It includes background information on the history of the town, such as the Furness Railway, iron ore in the area and shipbuilding, and lists vessels built at Barrow pre- and during the war with information on what happened to them. These vessels include Mikasa and HMS Vanguard. At the outbreak of World War One, Vanguard fought in the battle of Jutland. The Mayfly (or the Won't Fly as Churchill called it), built by Vickers at Barrow along similar lines to the very early Zeppelins, was launched in 1911. She was the first British rigid airship to be built. Today, Astute submarines for the Royal Navy keep Barrow busy and local people turn up when new submarines are launched. This book also acts as a reference guide to local war dead and war heroes, lost heroes, the area's recipients of the Victoria Cross, memorials with details of those commemorated (including those whose names were unwelcome on memorials). Barrow's War Memorial in Barrow Park was unveiled in November, 1921 by Field Marshall Sir William "Wullie" Robertson and records close to

600 names of those who fought and died in the First World War.

Alan Turing Aug 25 2020 Alan Turing was one of the most influential thinkers of the 20th century. He created one of the first designs for a stored-program computer and is widely considered to be the father of computer science and artificial intelligence. During World War II, Turing worked for the Government Code and Cypher School at Bletchley Park, Britain's codebreaking centre, where he was responsible for breaking German naval codes, including the supposedly unbreakable Enigma code, and helping the Atlantic convoys avoid German U-boat attacks. This work probably shortened World War II by up to four years, saving millions of lives. This is the story of the amazing life and work of a British hero and one of the greatest thinkers of the 20th century.

Displaced Heritage Oct 15 2019 Considerations of the effect of trauma on heritage sites.

German War Graves in the North East and Cumbria Sep 18 2022 During World War Two, a substantial number of German Luftwaffe aircrew were killed in action whilst flying missions over Britain. Their bodies were recovered and buried in war cemeteries, and this book is a guide to the graves of those German servicemen buried in the North East of England and Cumbria.

When Dragons Flew Oct 07 2021

The Soldier's Return Dec 09 2021 Right from the start, when the train carrying British soldier Sam Richardson home to Wigton after his service in the Burma campaign breaks down two miles from town and he and his army comrades have to walk home, it is clear we are in the hands of a compassionate, clear-sighted writer. Bragg's work has been compared to that of Hardy and D.H. Lawrence, not without some justice. His smalltown people are closely and warmly observed, but without

a shred of sentimentality, and although this story is familiar—a man home from a dehumanizing war finds it hard to readjust—it has seldom been imbued with such rueful humanity. For Sam, England after WWII, and after the sufferings he and his men endured in the frightful jungle campaigns, is stuffy and limiting; soon he starts dreaming of wider horizons. His adored wife, Ellen, however, is happily rooted in the little northern town where she grew up; their small son, Joe, who has hardly known his father, is bewitched but also terrified of him. How the family works out its fate in the shabby postwar years is Braggs' story, and he makes of it something at once endearing and heroic. So many scenes, the regimental reunion, Joe's efforts to win friends among the tough town kids, a final scene at a railway station as heartrending as the movie *Brief Encounter*, linger in the mind. The book is a small classic, deeply touching and true. Skyhorse Publishing, as well as our Arcade, Yucca, and Good Books imprints, are proud to publish a broad range of books for readers interested in fiction—novels, novellas, political and medical thrillers, comedy, satire, historical fiction, romance, erotic and love stories, mystery, classic literature, folklore and mythology, literary classics including Shakespeare, Dumas, Wilde, Cather, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

Beatrix Potter Feb 11 2022 Drawing on the V&A's collection of Beatrix Potter's artwork -the largest in the world -and little-seen material from international collections, this beautiful book explores her achievements as a naturalist, artist-storyteller and sheep farmer, and her legacy in preservation of the Lake District. Potter's work has delighted audiences for over a hundred years. A creative pioneer and determined entrepreneur,

she combined scientific observation with imaginative storytelling to create some of the world's best-loved children's books. Packed with much-loved characters such as Jemima Puddleduck and Squirrel Nutkin, alongside exquisite botanical drawings, humorous picture letters to friends, Lake District watercolours, rarely seen photographs and an essay by James Rebanks this publication embeds Potter's celebrated characters in the context of her life, from the confines of middle-class London to the expanse of Lake District hill farming, identifying the people and places that inspired her.

A Wearside Lad in World War II Nov 15 2019

A Son of War Jan 18 2020 The second volume of a trilogy that began with *The Soldier's Return*.

A Dalesman's War Nov 08 2021 This is the story of Stan Haygarth's war. Born and bred in Dent, Cumbria, Stan served as Cavalryman in the 24th Lancers and the Royal Tank Regiment in World War II. He served in Normandy where he was badly injured when a German shell hit his tank.

Prisoner of War Camps in Britain During the Second World War Mar 20 2020 At the beginning of the Second World War, there were two Prisoner of War camps in Britain. By the time the War ended, there were over 600. This book explores the role of the camps, their famous prisoners and surprising stories, including murder and dramatic escapes.

A History of Cumberland May 22 2020

Windermere and Grasmere in the Great War Aug 17 2022 *Windermere and Grasmere in the Great War* is an expert account of these Lake District town's fascinating contributions to the Great War effort from the outbreak of war in 1914, to the long-awaited Allied victory in 1918. The book is designed to be accessible to all, and for this reason it includes the history of the South Lakes area of Cumbria, where the scarcity of visitors was

felt during the Great War. Interesting stories include Lake Windermere setting as a watery runway, rumors that a German airship was operating from a secret base near Grasmere, the double life of Arthur Ransome, and Cumberland Wrestling's postwar boom. The book also takes a detailed look at the graduates of the Lakes Flying Company, the Hardistys, VAD nurse Nellie Taylor, the Baisbrowns, the boatmen who sewed bags for sand, the gunpowder carts, Beatrix Potters opinions, conscientious objectors, landowners and gentry, Cobby the horse, railwaymen, and prisoner of war Frederick Mallinson. It acts as a reference guide to local war memorials, and a chronological guide to Belgian refugees in south Lakeland whose homes included Ellerthwaite Lodge, Windermere, Calgarth Park auxiliary hospital, Troutbeck Bridge, and the village of Finsthwaite. St Martins next to the Old England Hotel, Windermere, has more memorials than any other church in Cumbria including the Cathedral (Carlisle). Overall, this is a poignant testimony to the bravery, self-sacrifice and determination of the people of Windermere and Grasmere during the Great War, who sought to find normality in a reality so far removed from anything they had ever known.

After the War Feb 28 2021

Cumberland at War Jan 22 2023

Cumbria at War 1939-45 Nov 20 2022

The Railway Goods Shed and Warehouse in England Apr 20

2020 Although goods traffic accounted in many cases for a higher proportion of railway companies' revenue than passengers, the buildings associated with it have received very little attention in comparison to their passenger counterparts.

They once played as important a role in distribution as the 'big sheds' near motorway junctions do today. The book shows how the basic design of goods sheds evolved early in the history of

railways, and how the form of goods sheds reflected the function they performed. Although goods sheds largely functioned in the same way, there was considerable scope for variety of architectural expression in their external design. The book brings out how they varied considerably in size from small timber huts to the massive warehouses seen in major cities. It also looks at how many railway companies developed standard designs for these buildings towards the end of the 19th century and at how traditional materials such as timber, brick and stone gave way to steel and concrete in the 20th. This building type is subject to a high level of threat with development pressure in urban and suburban areas for both car parking and housing having already accounted for the demise of many of these buildings. Despite this, some 600 have been identified as still extant and the book will, for the first time, provide a comprehensive gazetteer of the surviving examples.

The Stone Circles of Cumbria Sep 06 2021 Cumbria is an ancient kingdom of Romanized Britons, extending from the lake country in England to Loch-Lomond in Scotland.

Naval Ship Models of World War II in 1/1250 and 1/1200

Scales Jun 03 2021 A guide for collectors and modelers—packed with photos, technical information, practical advice, and history. The origins of 1/1250 and 1/1200 scale models can be traced back to the first years of the twentieth century and their use as identification aids by the military during the First World War. When peace came, the manufacturers aimed their increasingly sophisticated products at collectors, and ever since then acquiring, enhancing, modifying, or scratch-building miniature ship models has been an avidly pursued hobby around the world. This new book focuses on models of the ships of the Second World War, and the author addresses all the practical issues that might confront collectors who like to

enhance, convert, and modify their models, or even scratch-build models of ships not commercially available. The book covers both Allied and Axis warships, naval airplanes, merchant conversions, and even an Italian armed schooner, and provides historic and technical information on the ships represented as well as practical advice on modeling them—including twenty-five chapters covering everything from initial production techniques such as spin casting, silicon mold casting, resin casting, die-casting, plastic mold injection, and 3D printing through techniques for enhancing and modifying models to eventually researching and scratch-building an uncommon ship or type. Cumbria Aug 05 2021 **PLACES & PEOPLES: PICTORIAL WORKS.** The Lake District is one of the world's most beautiful regions, attracting millions to its unspoilt countryside each year. Now in paperback, this definitive book is a must for visitors and natives alike; even those who know and love Cumbria will find much here that is new and revealing. This monumental work, complemented by 200 magnificent illustrations, covers every aspect of Cumbria. The history, the people, the architecture, the topography, the arts and the tourist attractions are all expertly and lovingly described. Based upon a deep knowledge of almost every valley and fell, the book comprehensively embraces all that is noteworthy from Morecambe Bay in the south to the Scottish border in the north, and from the Irish Sea coast in the

west to the Pennines in the east.

Anglo-American Shipbuilding in World War II Dec 17 2019

This important study details one of the most monumental industrial undertakings in history from an economic geographic perspective.

Official Records of the Union and Confederate Navies in the War of the Rebellion Dec 29 2020

Jambusters Jun 22 2020 The compelling true story that inspired the hugely successful major ITV drama series HOME FIRES – now in its second season. The Second World War was the WI's finest hour. The whole of its previous history - two decades of educating, entertaining and supporting women and campaigning on women's issues - culminated in the enormous collective responsibility felt by the members to 'do their bit' for Britain. With all the vigour, energy and enthusiasm at their disposal, a third of a million country women set out to make their lives and the lives of those around them more bearable in what they described as 'a period of insanity'. Through archive material and interviews with many WI members, Julie Summers takes us behind the scenes, revealing their nitty-gritty approach to the daily problems presented by the conflict. Jambusters is the fascinating story of how the Women's Institute pulled rural Britain through the war with pots of jam and a spirit of make-do-and-mend.

Signalling and Signal Boxes along the NER Routes Sep 25 2020

Allen Jackson explores signalling along the NER, formerly part of the LNER.

Cumbria's Prehistoric Monuments Apr 13 2022 Whether it is Hadrian's Wall, Kendal Castle or the beautiful fells of the Lake District – for thousands of years people have found a certain elegance and utility in stone. Nestled amongst these common relics are a multitude of massive stone monuments, built over

3,000 years before British shores were ever touched by Roman sandals. Cumbria's 'megalithic' monuments are among Europe's greatest and best-preserved ancient relics but are often poorly understood and rarely visited. Cumbria's Prehistoric Monuments aims to dispel the idea that these stones are merely 'mysterious'. Instead, within this book you will find credible answers, using up-to-date research, excavation notes, maps and diagrams to explore one of Britain's richest archaeological landscapes. Featuring stunning original photography and newly illustrated diagrams of every megalithic site in the county, Adam Morgan Ibbotson invites you to take a journey into a land sculpted by ancient hands.

Gloucestershire Airfields in the Second World War Jul 24 2020
A full account of the part played by Gloucestershire's airfields during the Second World War. The history of each airfield is described with the squadrons and aircraft based at them and the main operations flown. The effects of the war on the daily lives of civilians and the constant dangers from raids and night bombing are also detailed. Fully ill

Hatton and her British husband Andrew relocate from New York

City to a small village on the Cumbrian coast. Jane has been city-based and career-driven but when her fourteen year old daughter Natalie falls in with the wrong crowd at school in Manhattan, she and Andrew decide to try country living. However Jane has trouble getting used to the silence and solitude of a remote village. Natalie hates her new school, and eleven-year-old Ben struggles academically. Only eight-year-old Merrie enjoys country life. Has Jane made a horrible mistake? The Hattons have bought the old vicarage in the village. When Jane finds a scrap of shopping list, she grows curious about Alice, the vicar's wife who lived there years before. As we follow the twin narratives of Jane, in the present, and Alice in the 1930s we discover that both are on a journey to discover their true selves, and to address their deepest fears.

Whitehaven in the Great War Oct 19 2022 Whitehaven in the Great War covers Whitehaven's immense contribution to the Great War effort; it is thought that 625 Whitehaven men – from a town that, in 1901, had a population of around 21,000 – lost their lives fighting in the war. Meanwhile, on the home front, military service deprived many businesses of their established male workers, and women went to work in what had previously been exclusively male areas of employment. Notable people written about include recipient of the Victoria Cross Abraham Acton, an Orangeman in Whitehaven; local hero Robert Curwen Richmond Blair DSO, EM; and close friend to Kaiser Wilhelm II, Lord Lonsdale, the famous Yellow Earl who formed his own Pals battalion, the Lonsdales (11th Battalion, Border Regiment), to fight the Germans. It was often said, 'No bombing Zeppelin or Gothe ever attacked our peaceful backwater during hostilities.' However, on 16 August 1915 a U-boat, U-24, shelled the Harrington Coke works at nearby Lowca. This unexpected attack caught the community off-guard, and during the hour-

long bombardment fifty-five shells rained down on the factory and the surrounding area – not one single shot was fired in return. War memorials to those killed in the Great War have been moved following church closures, however this book acts as a practical reference guide to where these memorials stand today. Interesting stories come to light, like that of Baden Powell Thornthwaite, whose name was inscribed on a local grammar school war memorial, who had not died after all, but most likely deserted.

Official Records of the Union and Confederate Navies in the War of the Rebellion ... May 02 2021

Wimbledon, Merton & Morden at War, 1939–45 Nov 27

2020 More than 350 bombs fell on Wimbledon during the Second World War, killing 150 residents and injuring a further 1,071. Around 12,000 houses were damaged and 810 destroyed. Notable people discussed in this fascinating book include Ernest Leonard Harvey, who was onboard HMS Suffolk on the night Bismarck was spotted; Peter Walley, who died when he steered his crashing aircraft away from housing in the area; Pat Reid, Colditz Castle escapee; PoW Ernest Colman's "Wimbledon Variation"; casualties of the Burma-Thailand railway; and the members of the Mitcham Home Guard who were killed when a German parachute mine hit the Tower Creameries site on Wednesday, 16 April 1941 (after a relatively quiet couple of weeks). This well-researched book also includes a list of the lost hospitals of Wimbledon, as well as war memorials in the London Borough of Merton findings which have since been added to the Imperial War Museum's website, www.iwm.org.uk. It also provides an insight into factory worker jobs that have long since bitten the dust. Tri-ang in South Wimbledon was a national by-word for toys until it started making munitions for real. And, with the outbreak of war,

Vortexion of The Broadway, Wimbledon - a manufacturer of public address amplifiers - found itself under the direction of the Government for war work. Overall, this is a poignant testimony to the momentous efforts, bravery, self-sacrifice and determination of the people of Wimbledon during the Second World War, who sought to find normality in a reality so far removed from anything they had ever known.

Cumbria at War, 1939–45 Feb 23 2023 The outbreak of war marked a new era for the people of Cumbria. Many young men and women enlisted in the Forces, while older people joined the Home Guard or became Air Raid Precaution Wardens. Children from cities were sent to Kendal to escape the threat of bombing raids, members of the Women's Land Army began to arrive on at the local farms, and Silloth airfield near Carlisle trained thousands of pilots from allied countries. The first sign of German interest in the important shipbuilding town of Barrow-in-Furness was in May 1936, when a rigid airship and passenger aircraft flew very low and slowly over the Furness rooftops. Vickers shipyard became a target for enemy bombing and eventually more than 10,000 houses were damaged or destroyed by the Luftwaffe during the Barrow Blitz that took place during April and May 1941. Extensively researched, the book takes a detailed look at the ships built in Barrow, memorials in the city of Carlisle and towns and villages across Cumbria, and remembers the brave dead of Second World War. Overall, this is a poignant testimony to the momentous efforts, bravery, self-sacrifice and determination of the people of Cumbria during the Second World War, who sought to find normality in a reality so far removed from anything they had ever known.

Quartered Safe Out Here Mar 12 2022 'There is no doubt that [Quartered Safe Out Here] is one of the great personal memoirs of the Second World War' John Keegan

Text, Image, Interpretation Oct 27 2020 Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. From dark corners of brilliant minds come the best mysteries and thrillers of our time. This book focuses on the detective fiction of Georges Simenon. Project Webster represents a new publishing paradigm, allowing disparate content sources to be curated into cohesive, relevant, and informative books. To date, this content has been curated from Wikipedia articles and images under Creative Commons licensing, although as Project Webster continues to increase in scope and dimension, more licensed and public domain content is being added. We believe books such as this represent a new and exciting lexicon in the sharing of human knowledge.

From Auschwitz to Ambleside Jan 30 2021

A Manual of Archival Description Feb 17 2020

The Walls Have Ears Jan 10 2022 A history of the elaborate and brilliantly sustained World War II intelligence operation by which Hitler's generals were tricked into giving away vital Nazi secrets At the outbreak of World War II, MI6 spymaster Thomas Kendrick arrived at the Tower of London to set up a top secret operation: German prisoners' cells were to be bugged and listeners installed behind the walls to record and transcribe their private conversations. This mission proved so effective that it would go on to be set up at three further sites--and provide the Allies with crucial insight into new technology being developed by the Nazis. In this astonishing history, Helen Fry uncovers the inner workings of the bugging operation. On arrival at stately-homes-turned-prisons like Trent Park, high-ranking German generals and commanders were given a "phony" interrogation, then treated as "guests," wined and dined at exclusive clubs, and encouraged to talk. And so it was that the Allies got access to some of Hitler's most closely guarded secrets--and from those

most entrusted to protect them.

Cumbria Airfields in the Second World War Dec 21 2022 As the storm clouds of war were gathering over Europe in 1938, construction work began on two of Cumbria's biggest aircraft maintenance units - at Kirkbride and Silloth. Throughout the war these two airfields would handle between them literally thousands of aircraft, preparing new ones for the front-line and modifying and repairing others. Cumbria and the Isle of Man had early on been marked down as suitable places to build flying schools because of their relatively uncluttered skies and generally good weather. The Isle of Man also had an abundance of both bombing and air-to-air ranges which attracted an Air Gunnners School (Jurby and Andreas), Ground Defence Gunnners School (Ronaldsway) and various bombing and gunnery schools located on the island throughout the Second World War. This book describes the history of the different airfields and the varied but vital role they played in Britain's overall war effort. It also records the lives of the people caught up in the titanic struggle - both military and civilian. Martyn Chorlton has had a life-long interest in aviation, served in the RAF for nearly 13 years and is the author of *Leicestershire & Rutland Airfields in the Second World War* and *Airfields of North-East England in the Second World War*.
